

POD INSTALL MANUAL

Connect 4

JUUNOO

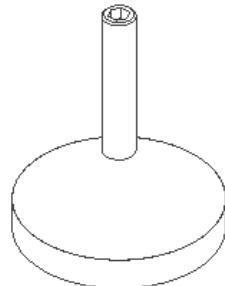

Partslist

Item	Part	#
1	JUUNOO - I module	7
2	JUUNOO - C module	6
3	Exterior - Click Panel – Standard	4
4	Exterior - Click Panel – Groove-Miter	3
5	Exterior - Click Panel – Tooth-Miter	3
6	glass door leaf 10 mm - 3/8" Hardened	1
7	JUUNOO - Floor panel 55x55	4
8	JUUNOO - Floor panel 60x55	2
9	JUUNOO - Floor panel 120x55	2
10	JUUNOO - Floor panel 120x60	1
11	JUUNOO - Ceiling panel (CON4)	2
12	JUUNOO - Ventilight 60 box (Ventilation + Lighting)	2
13	JUUNOO - Aluminium profiles set (Door, glass frame, plinth)	1
14	Interior - felt panels (1-2-3-4-5-6)	6
15	Door hinge – matte black	3
16	3-way Cable splitter	2

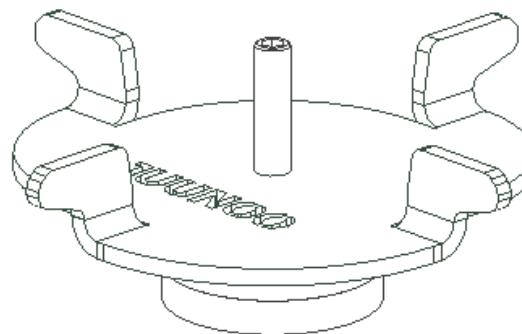

Item	Part	#
17	Light sensor(resistive) + connectors	1
18	1 m (39-1/4") extension cable + connectors	1
19	4 m (157-1/2") extension cable + connectors	1
20	5 m (197") Power supply cable	1
21 A	Carpet tiles + tape stickers	16
21 B	Doorlock + lever	1
23	Power outlet (US) + USB-A & USB-C	1
24	Power outlet (EU) + USB-A	1
25	Adhesive foam rubber seal	1 roll
26	Leveling foot	6
27	JUUNOO - leveling foot	14
28	JUUNOO - Table set (CON4)	1
29	hardware (screw) kit (CON4)	1
30	dropseal glass door + cover	1
31	JUUNOO - Acoustic foam hex panels	28
32	JUUNOO – floor mending plate 50x100	8

Tools

Tool
Allen key set (Nr 1 to 4)
Screw machine
Drill machine
Metal drill 3 mm
Level / laser
Rubber mallet
Step up (small stairs)
Cutting tool (knife)

Note: It is advised to build this pod with 2 people minimum.

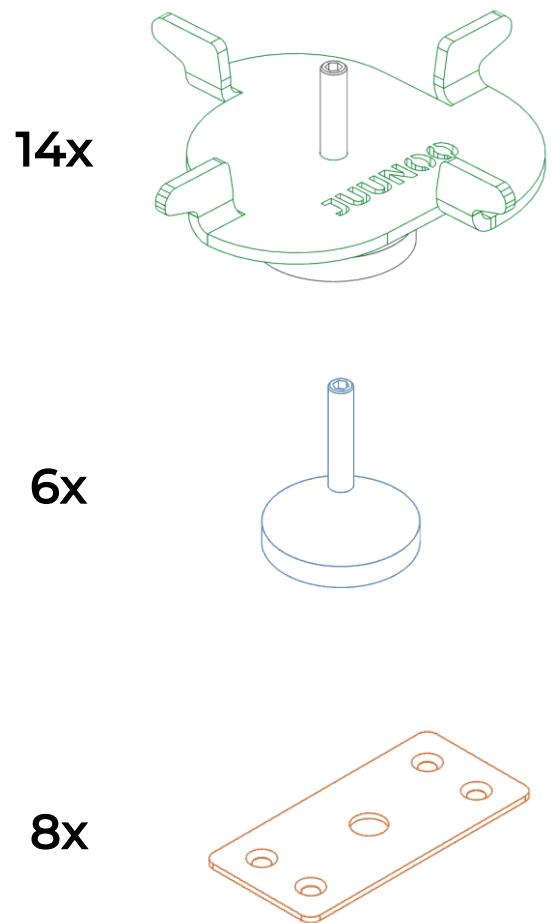

Screws

Screw ID.	
A	A countersunk wood screw with a flat head and a Phillips drive.
B	A countersunk wood screw with a flat head and a Pozidriv drive.
C	A countersunk wood screw with a flat head and a Truss head.
D	A self drilling screw with a flat head and a Phillips drive.
E	A self tapping countersunk screw with a flat head and a Phillips drive.
F	A wooden dowel with a flared end.
G	A white panhead screw with a flat head and a Phillips drive.
H	A self tapping panhead screw with a flat head and a Phillips drive.

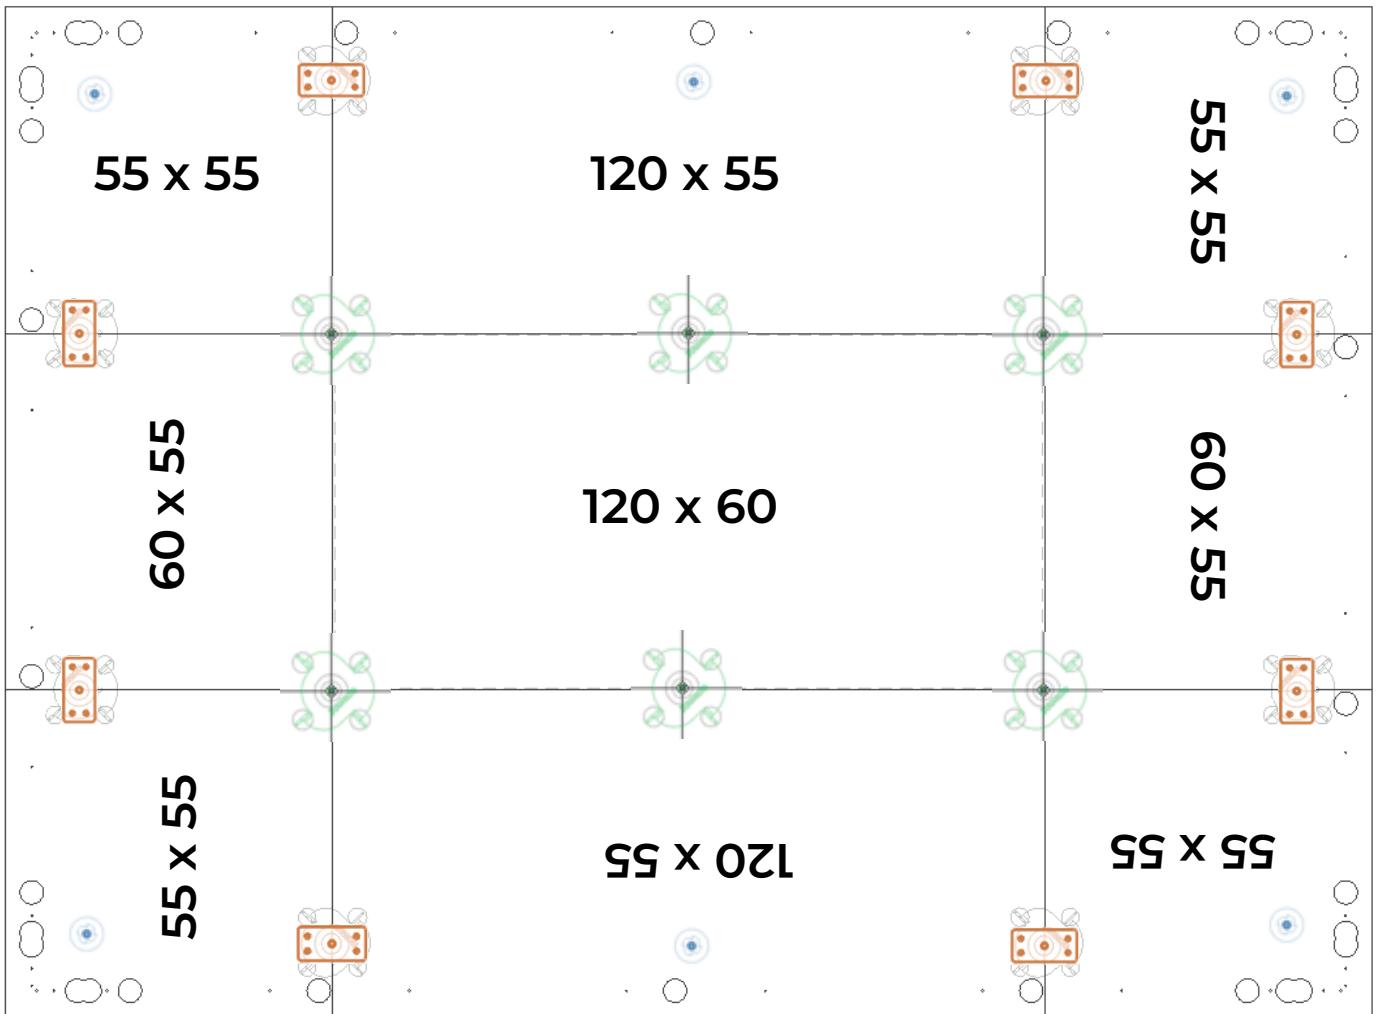

32 x wood screw countersunk	3.5 x 16 mm – T20 #6 x 5/8“ – T20
95 x wood screw countersunk	3.5 x 35 mm – T20 #6 x 1-3/8“ – T20
7 x wood screw countersunk	3.5 x 50 mm – T20 #6 x 2“ – T20
16 x Self drilling screw countersunk	3.9 x 25 mm – T15 #8 x 1“ – T15
29 x self tapping countersunk	3.9 x 13 mm – T20 #8 x 1/2“ – T20
12 x Wooden Dowel	8 x 40 mm 5/16" x 1-9/16"
4 x White panhead screw	4 x 60 mm – T20 #8 x 2-1/4“ – T20
6 x self tapping panhead	3.9 x 38 mm – T15 #8 x 1-1/2“ – T15

GuidePage: A-D

1 Lay out the floor tiles

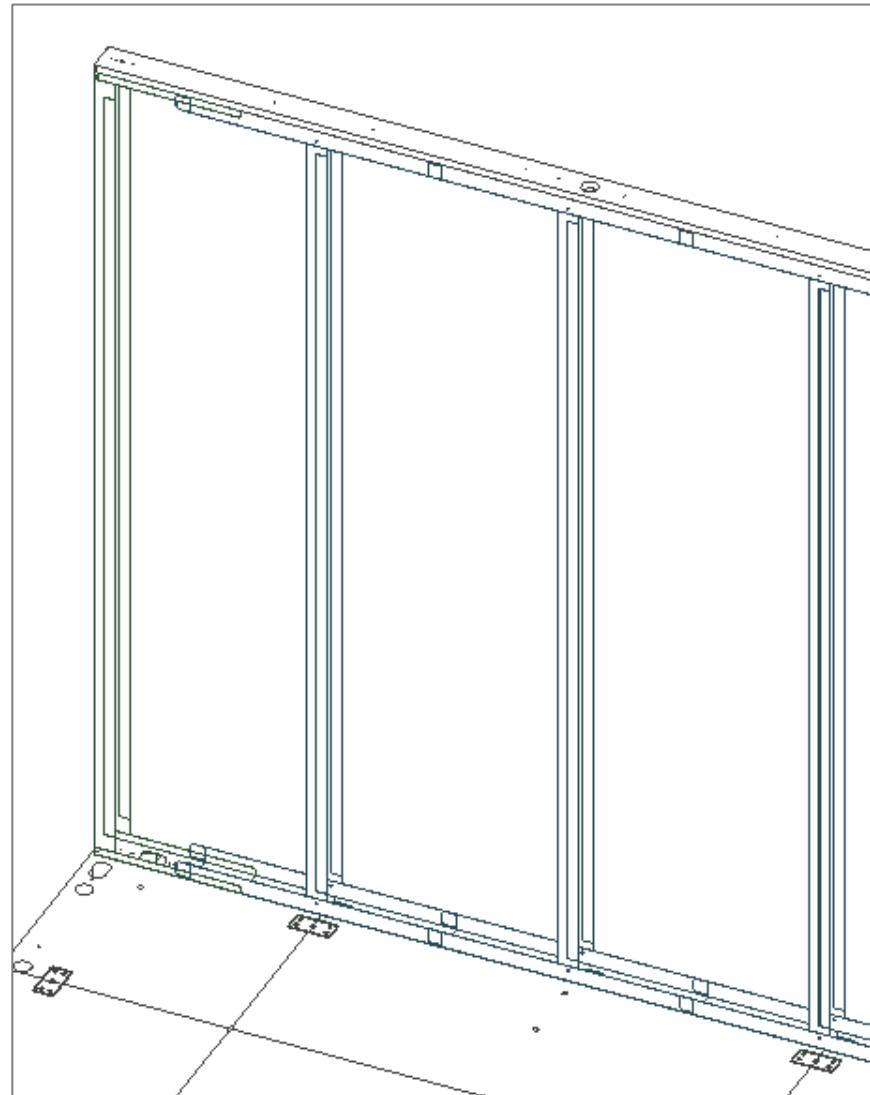

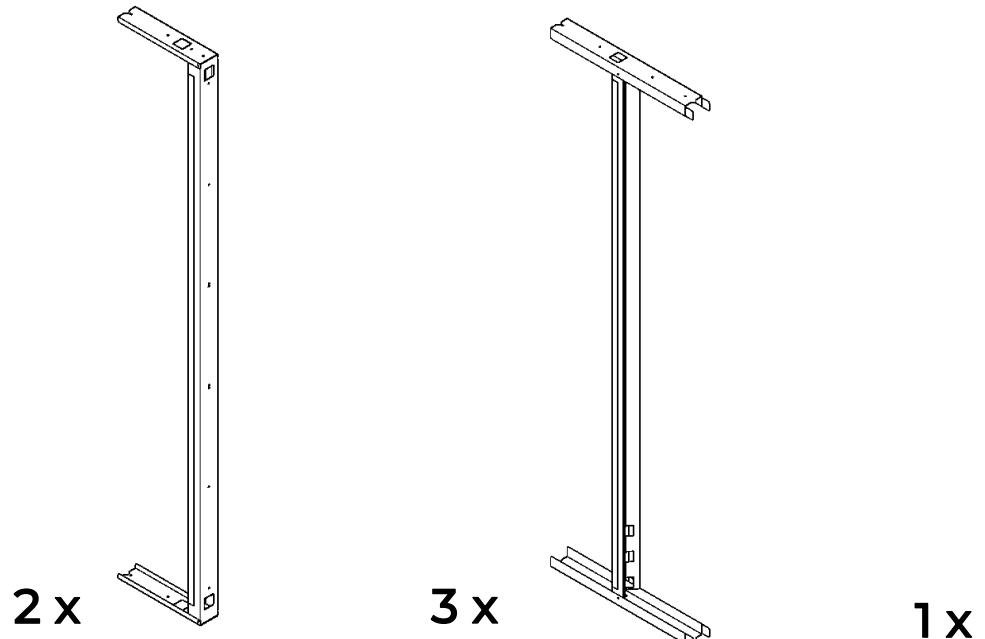

Floor grid: Connect 4

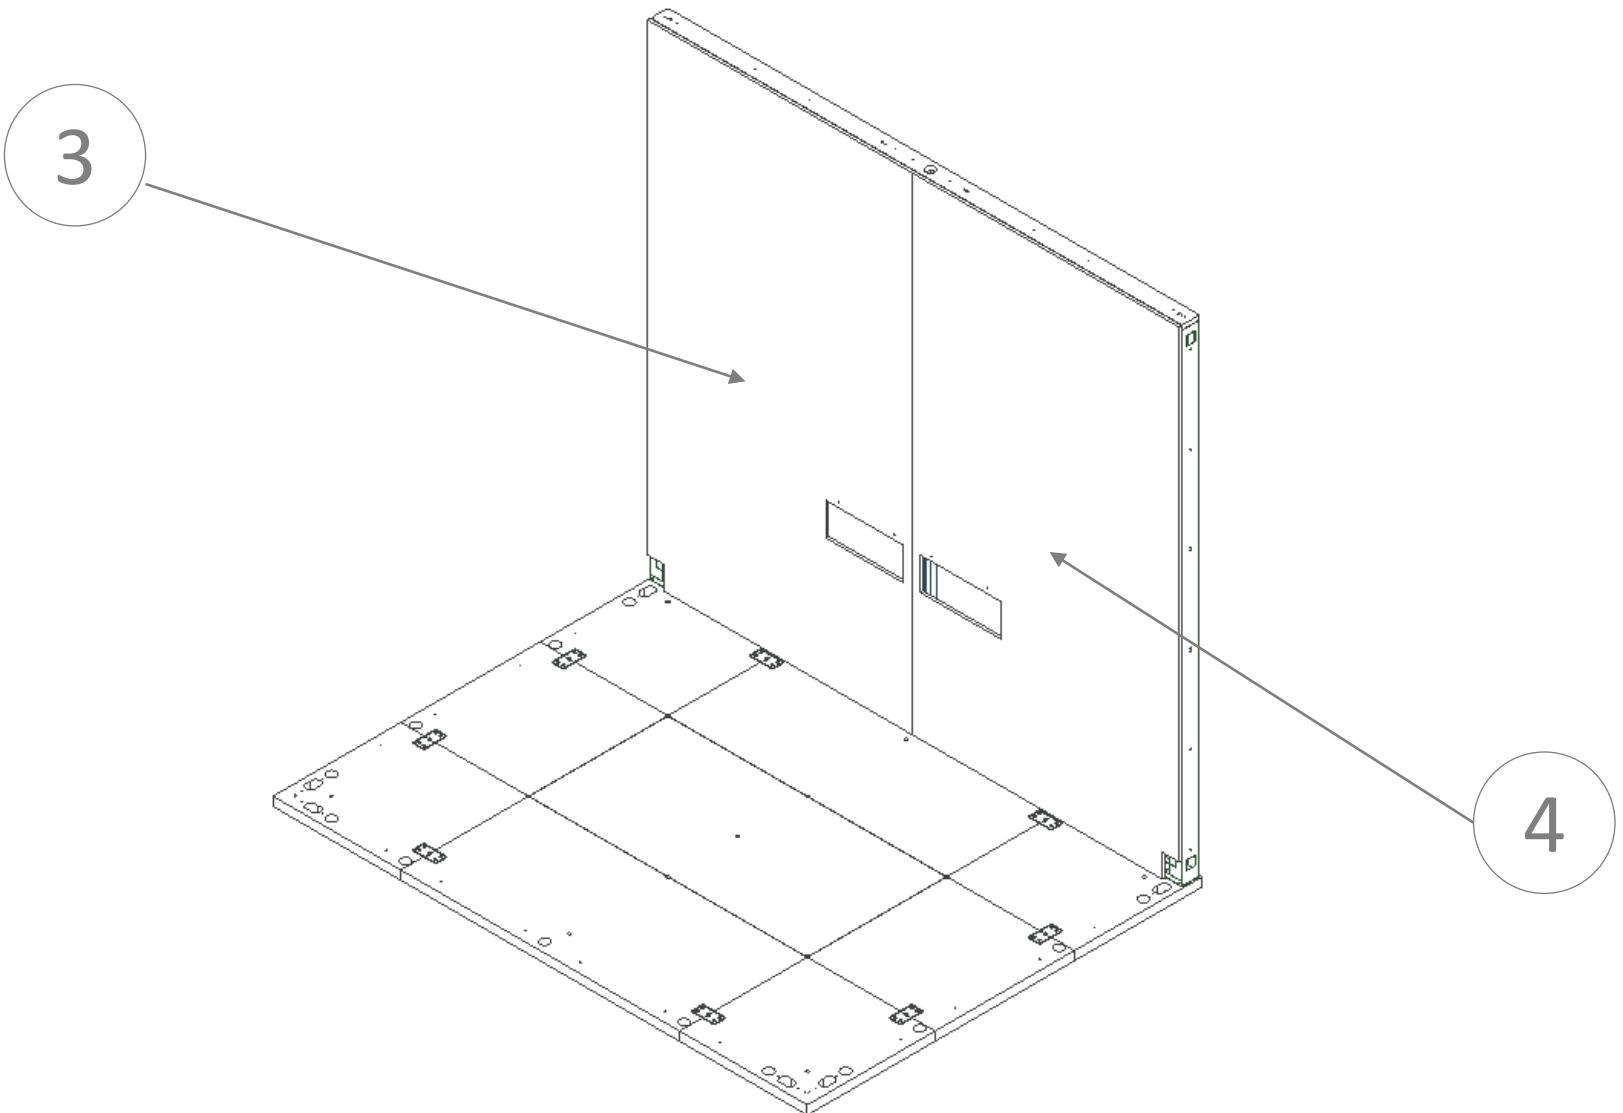

2 Install the rear wall

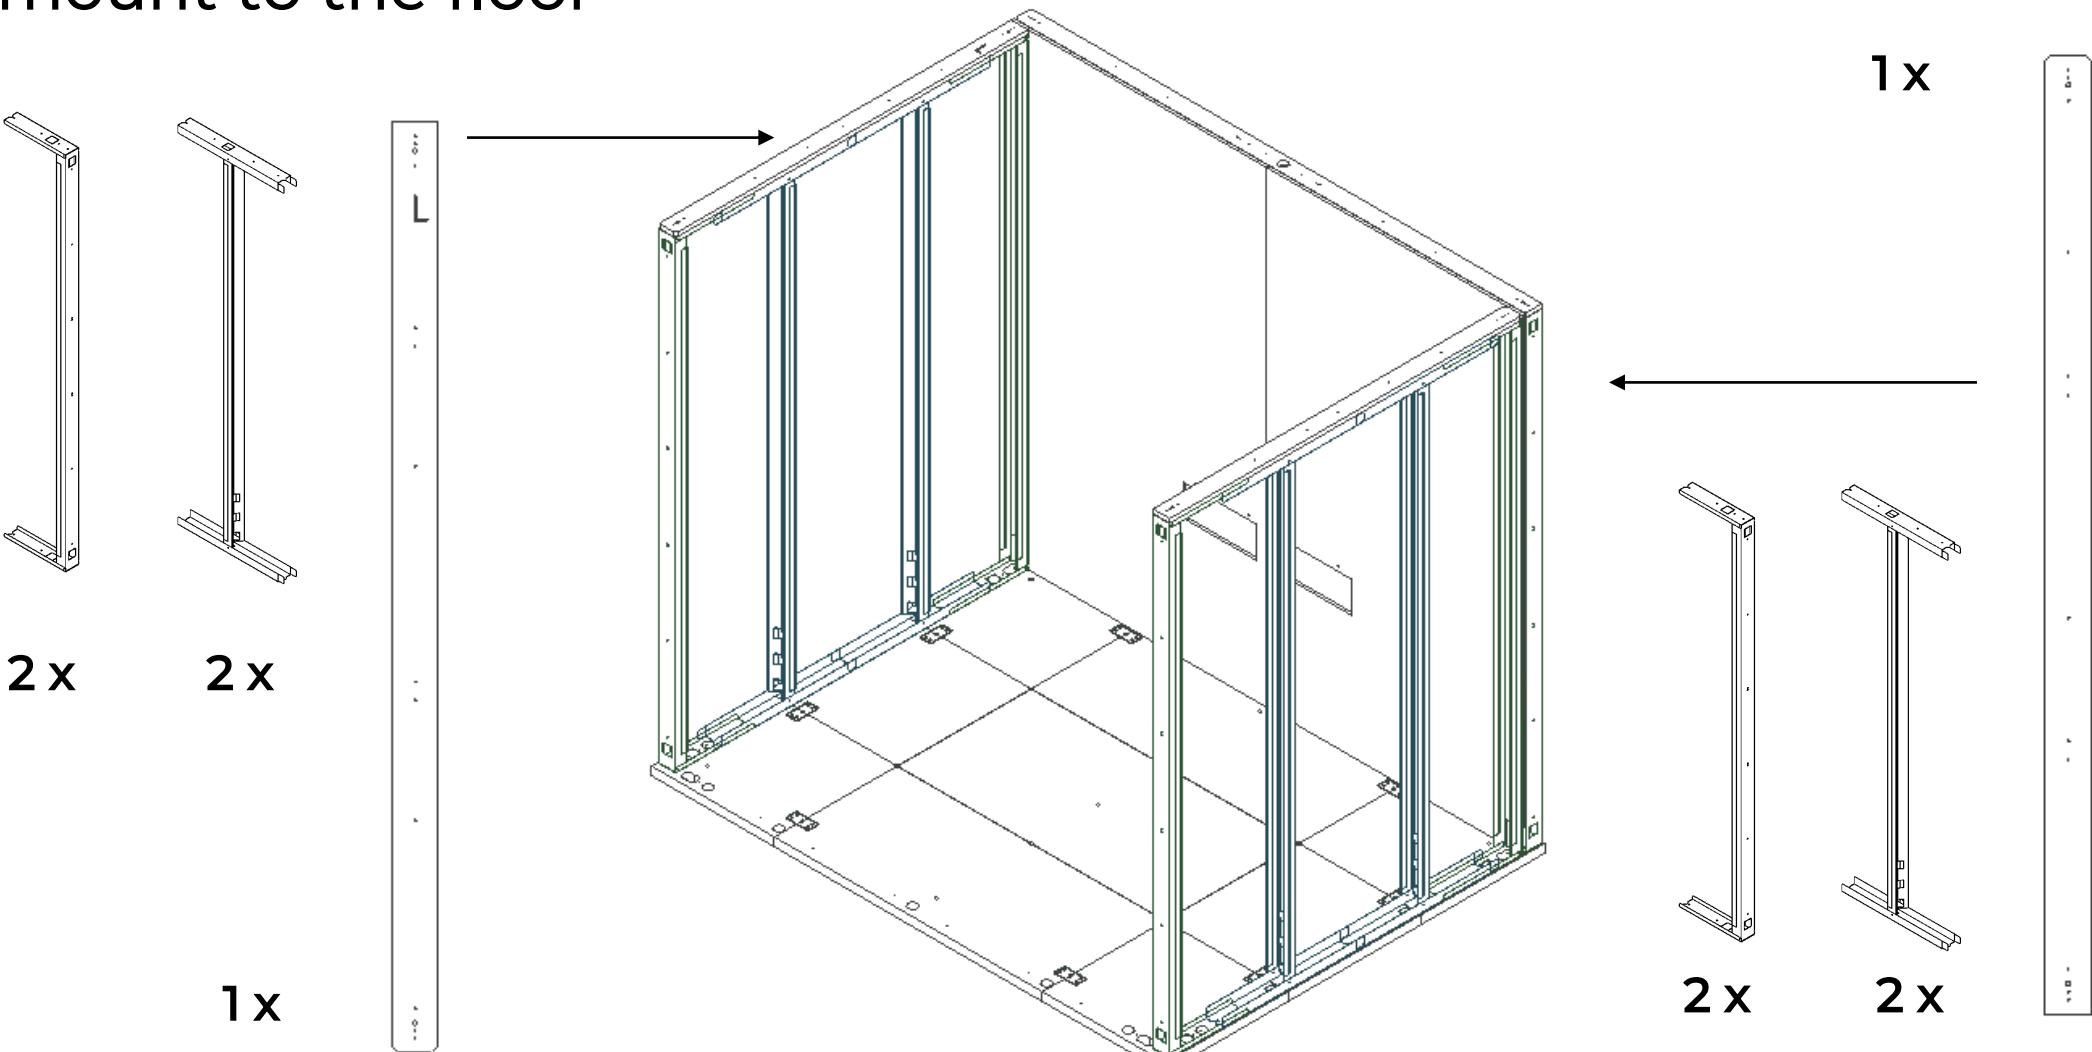

1. Prepare the module rear wall flat on the floor **GP: E-F-G**
2. Flip vertically and mount the wall on the floor panels **GP: H-I**

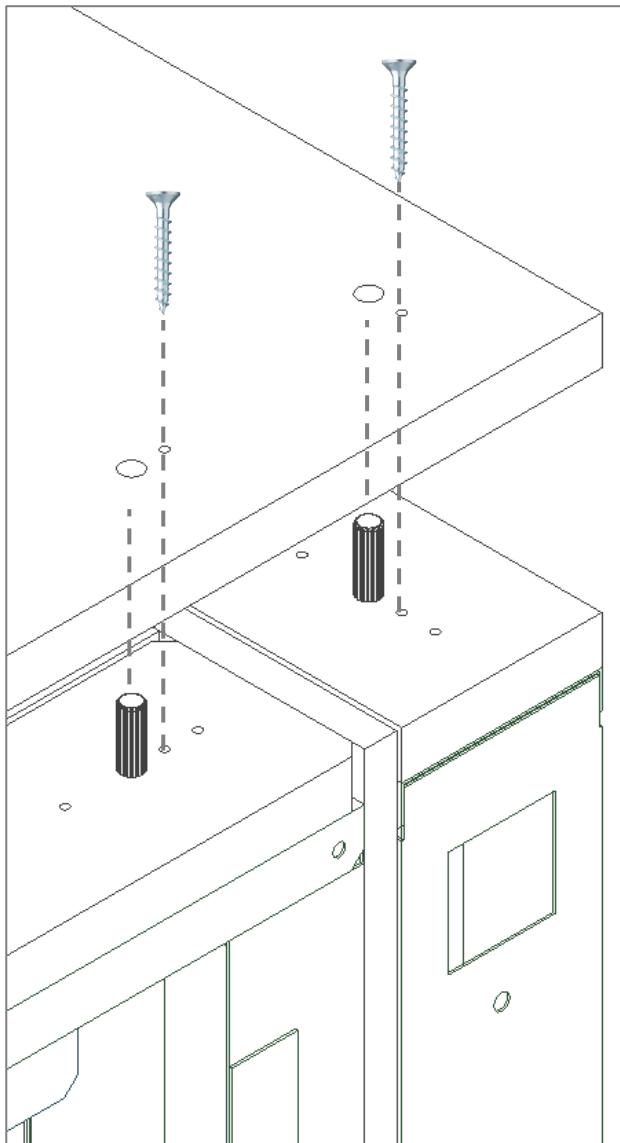

3 Mount the felt panels of the rear wall

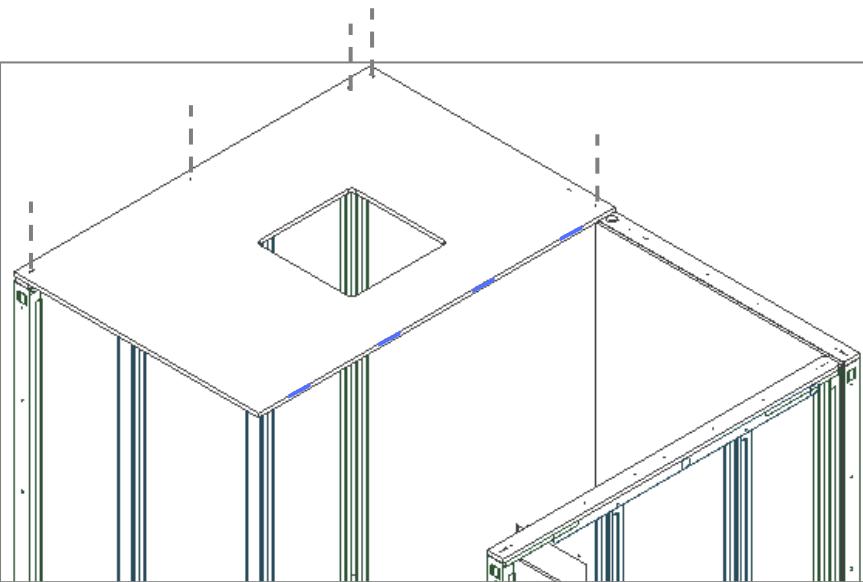

4 Pre-assemble the side walls and mount to the floor

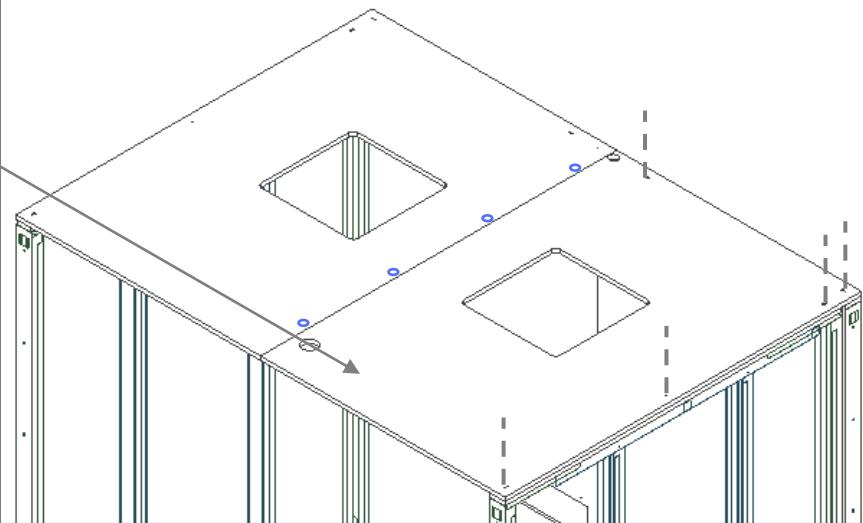

5 Position the ceiling on the wood dowels and screw it down.

5x screw B

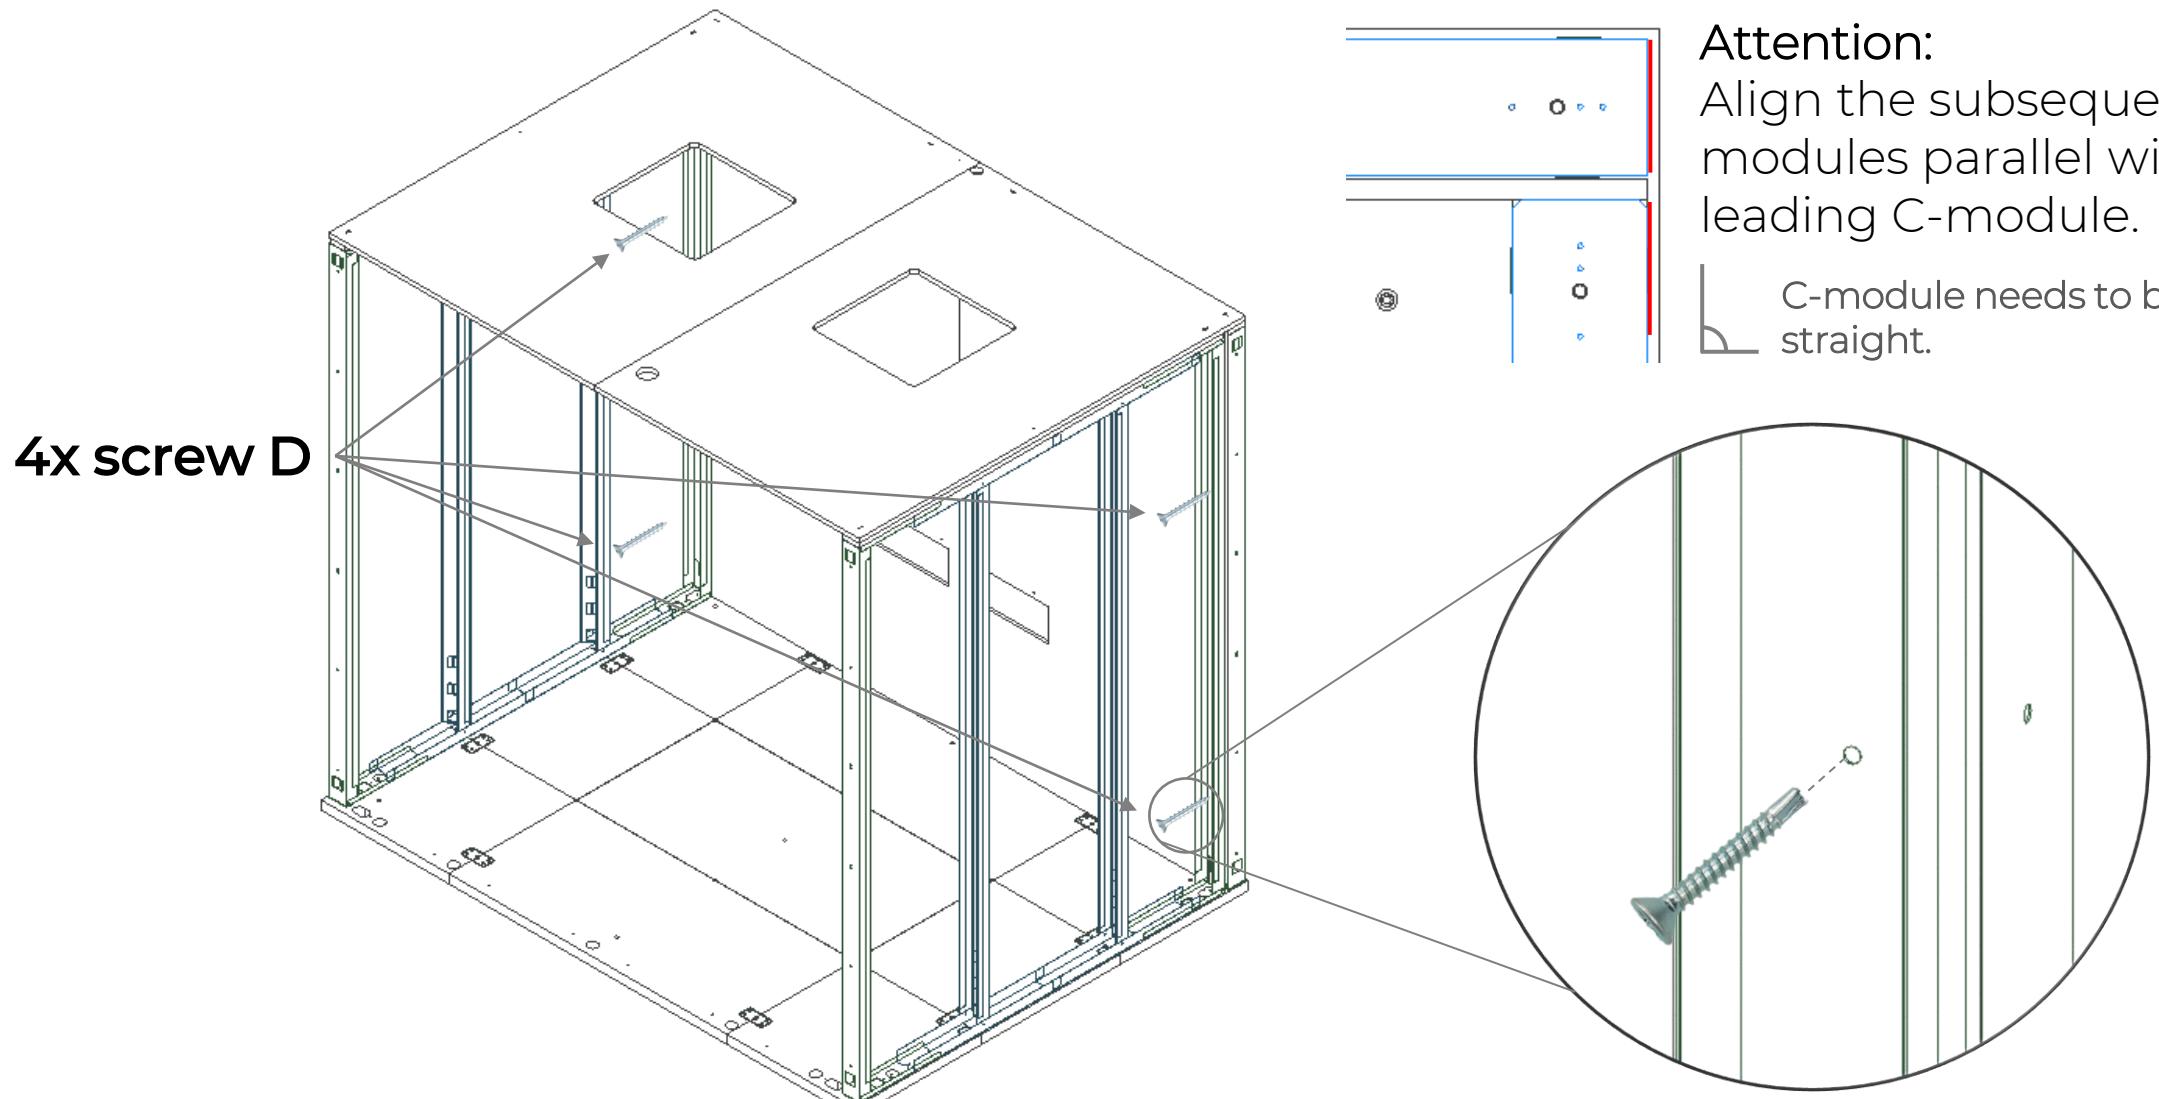

**4x Furniture
connector
- Allen key Nr.4**

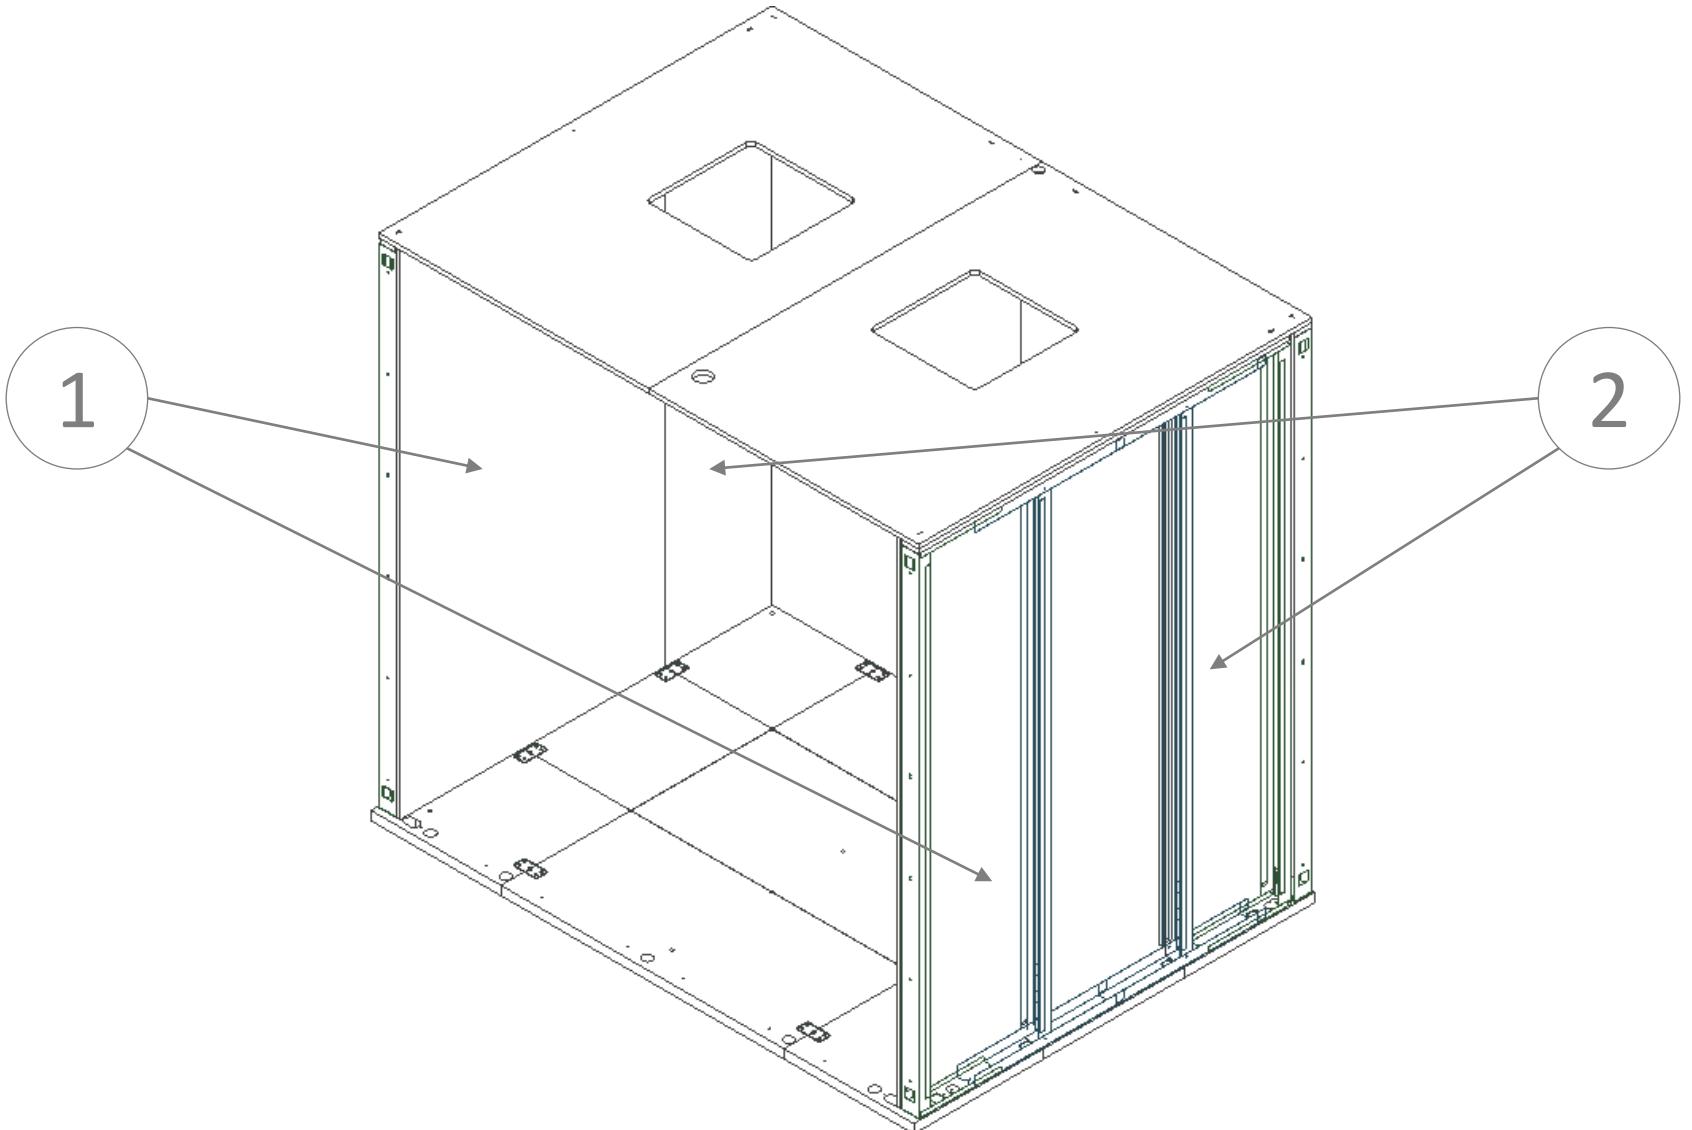

5x screw B

6 Fix the subsequent C-modules through the felt into the rear C-modules

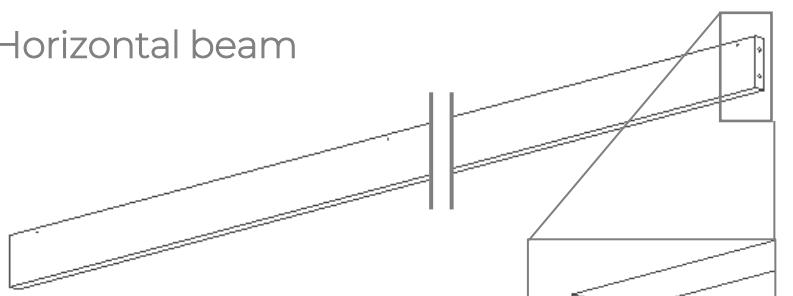

7 Stick the felt side panels to the modules.

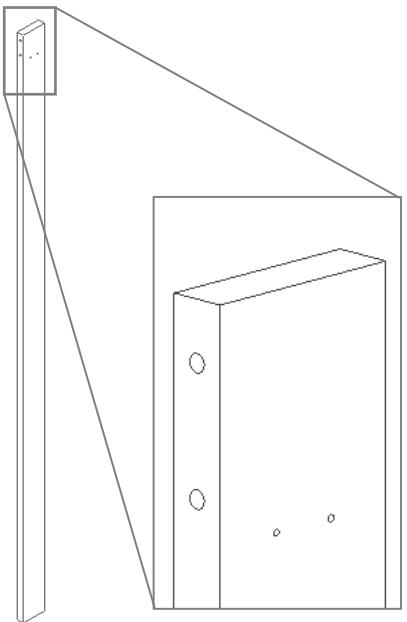

8 Join the front wood beams using dowels

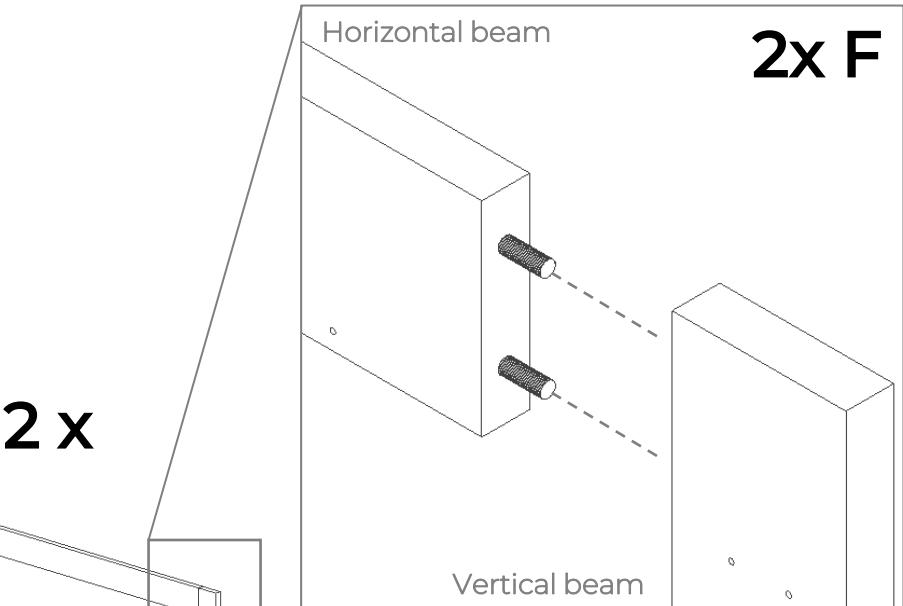

1 x Horizontal beam

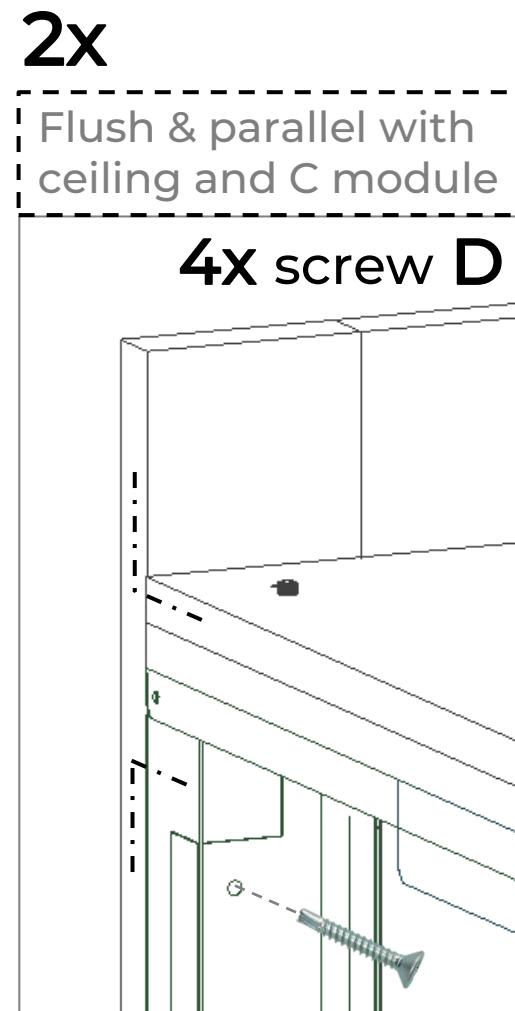

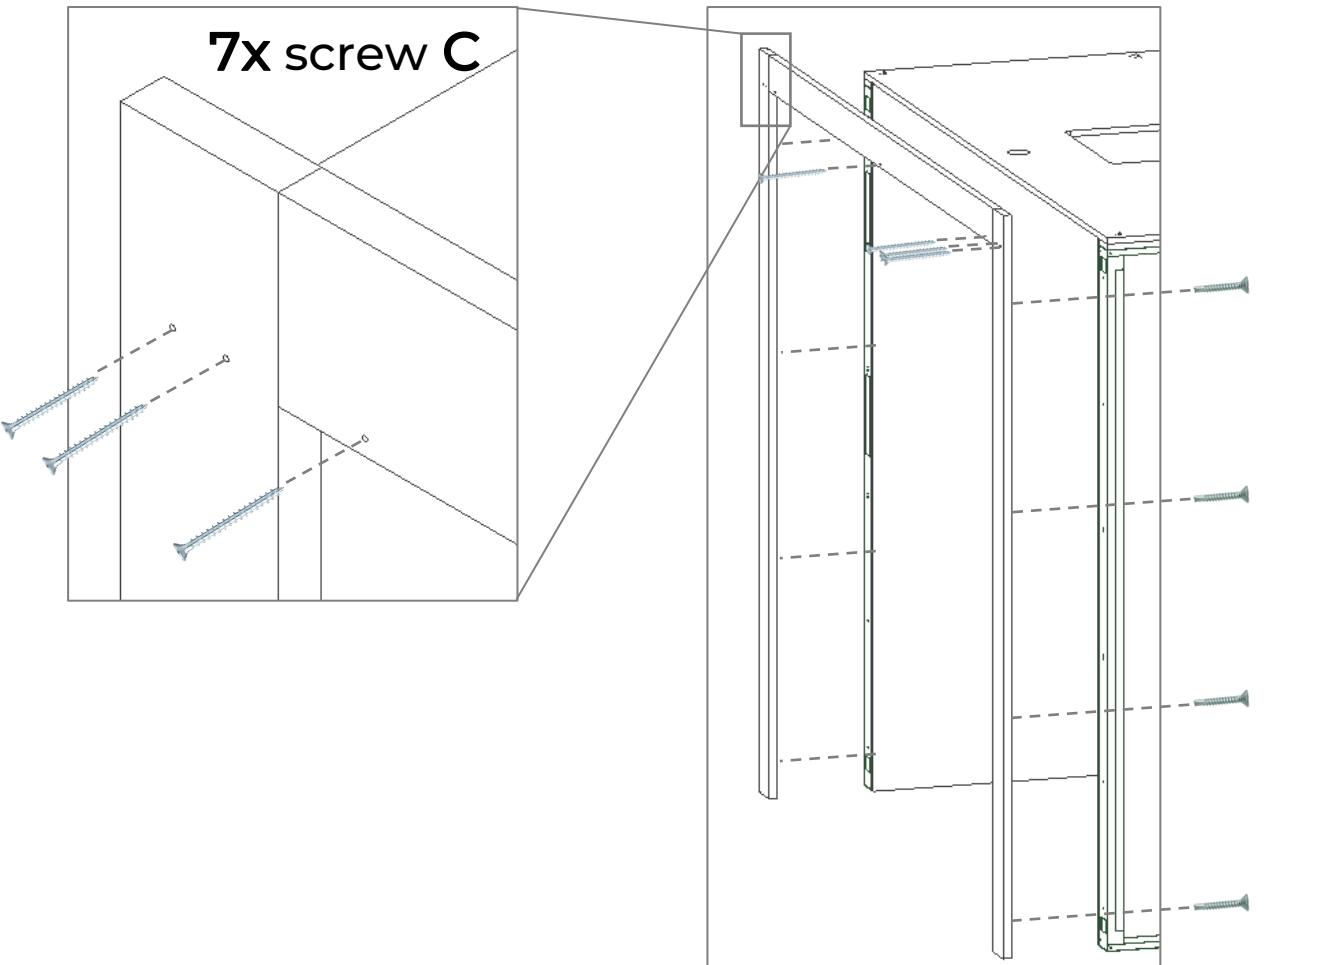

2 x Vertical beam

2x F

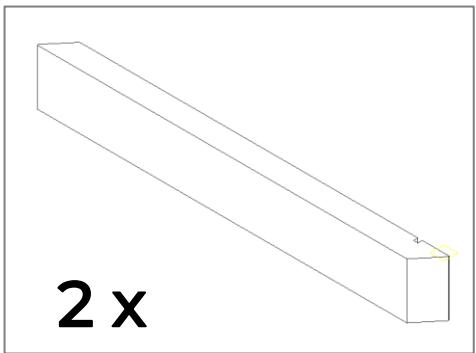

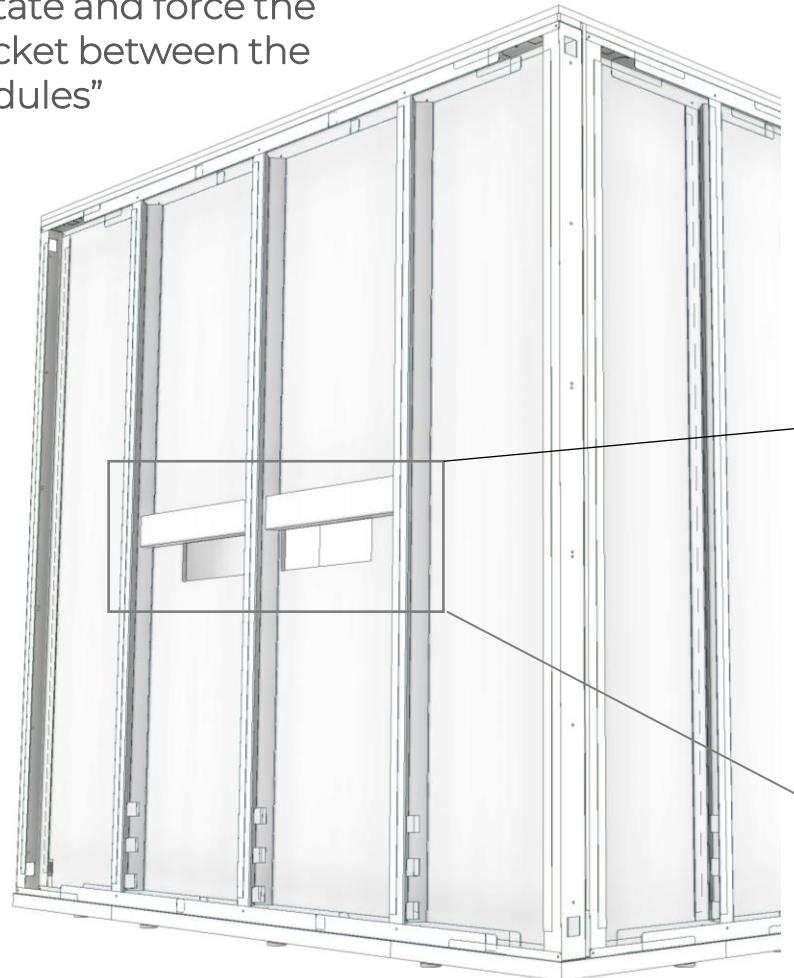

9 Screw the front woodbeams to the modules and the ceiling

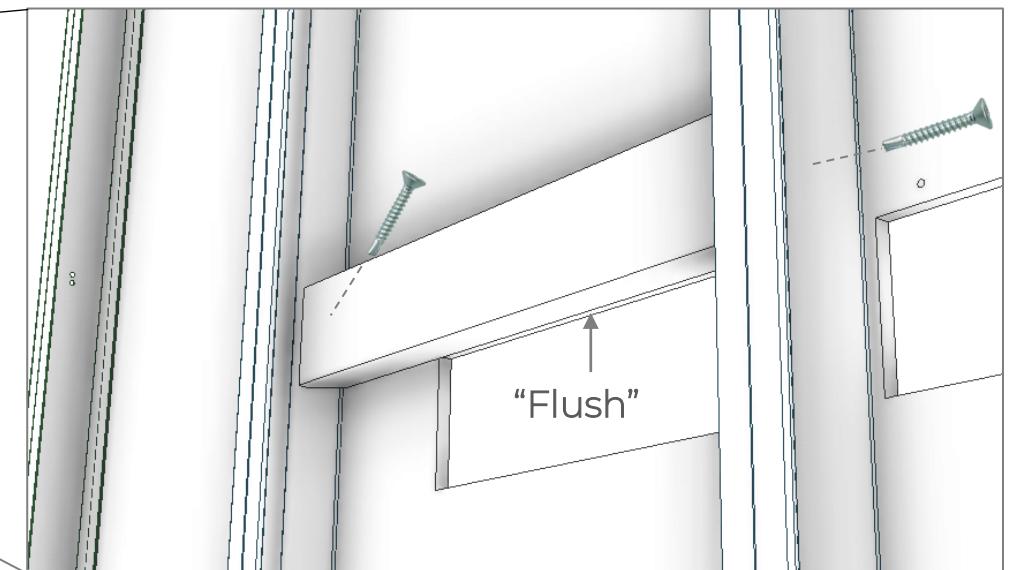

10 Mount the table support bracket above the hole in the felt.

"Rotate and force the bracket between the modules"

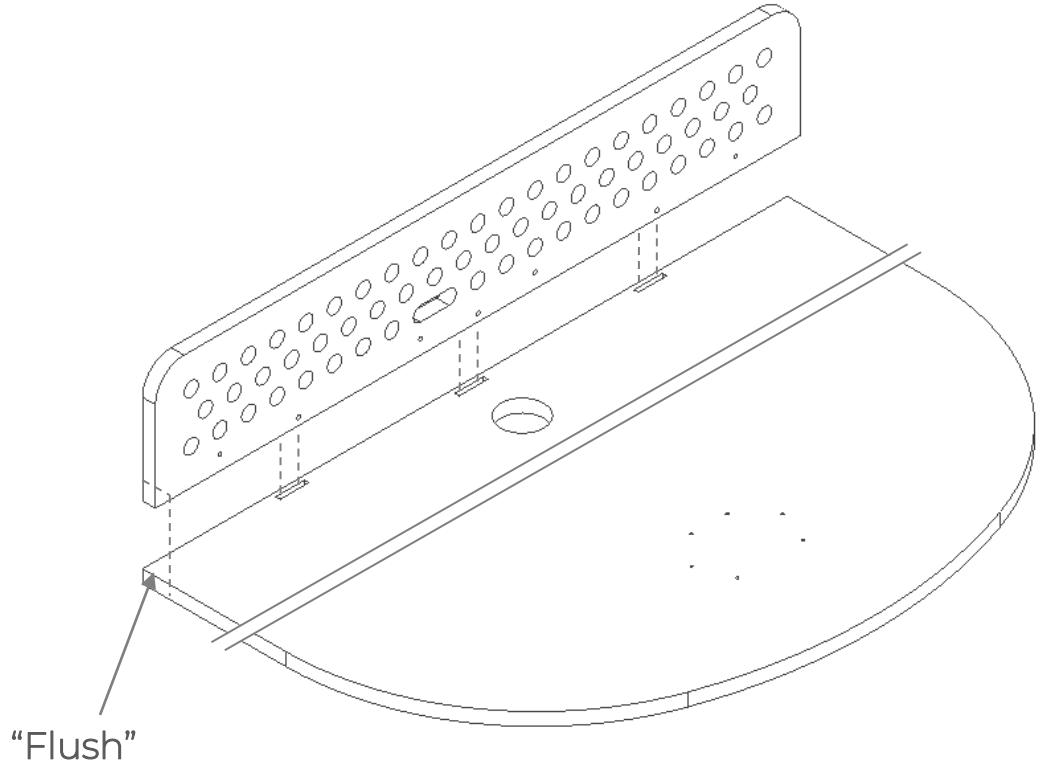

4 x screw D

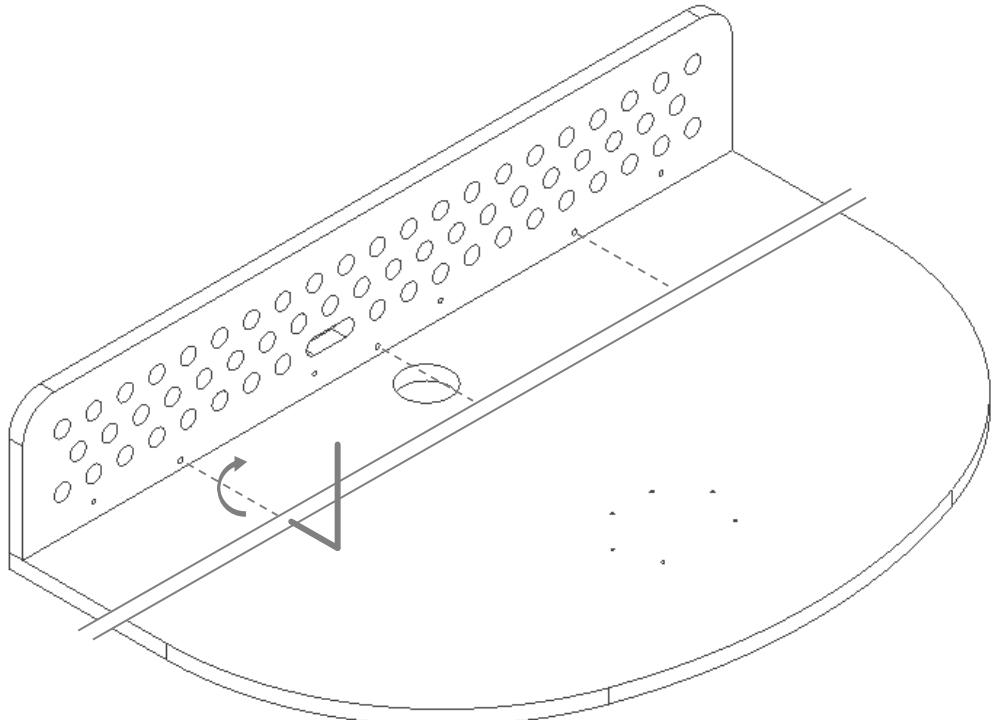

11 Assemble the table ventilation panel on the tabletop

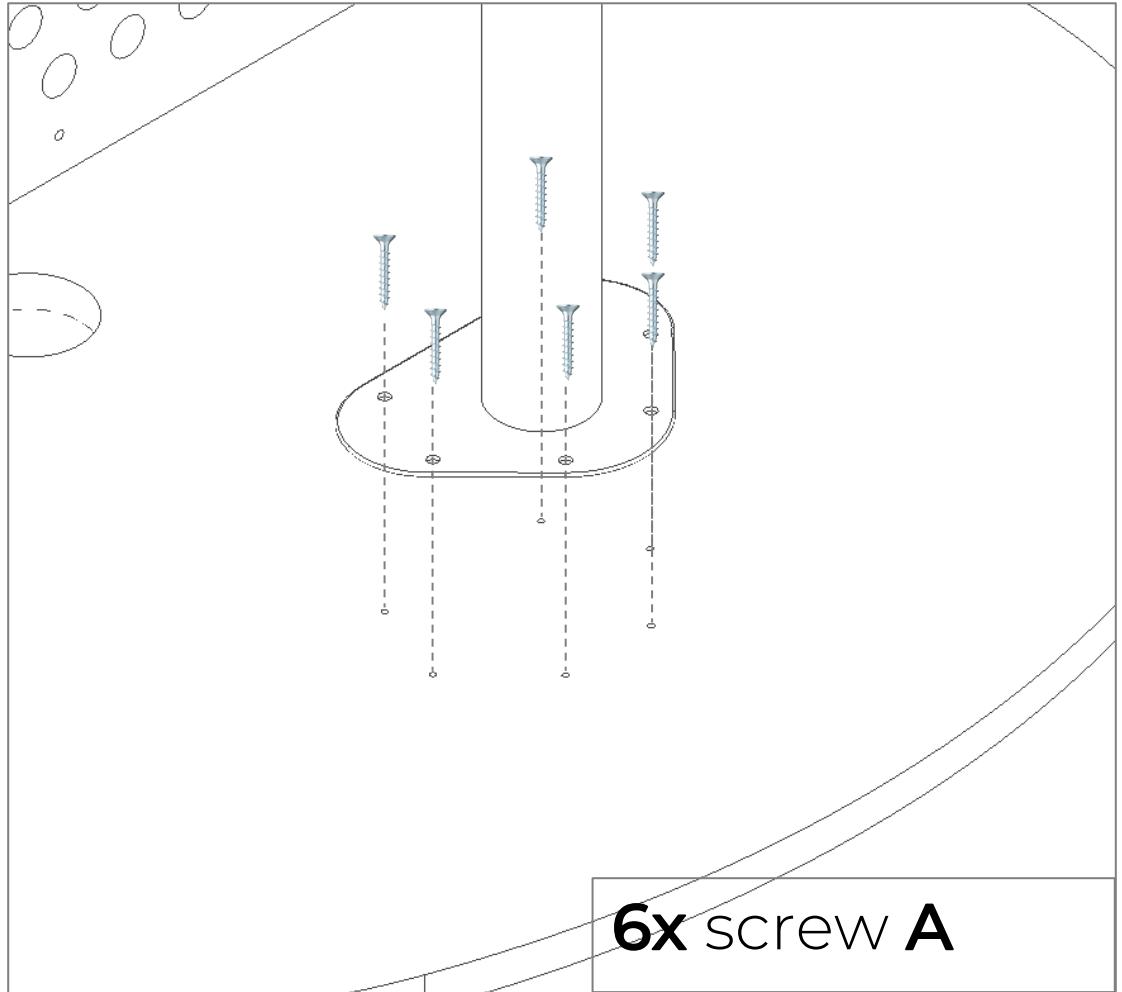

Align the black pins and position the panels flush to each other.

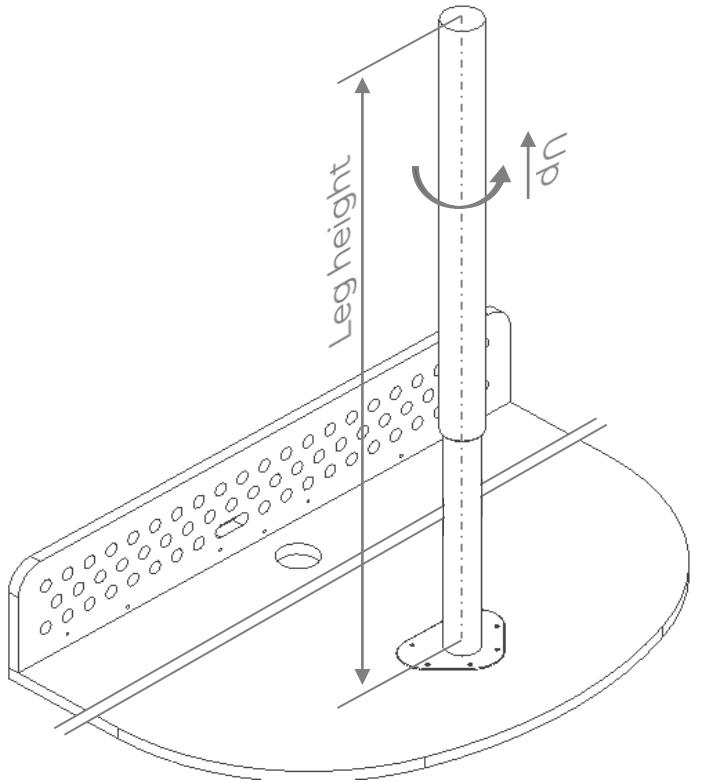

Connect the table panels by locking the pins with an allen key (Nr. 4).

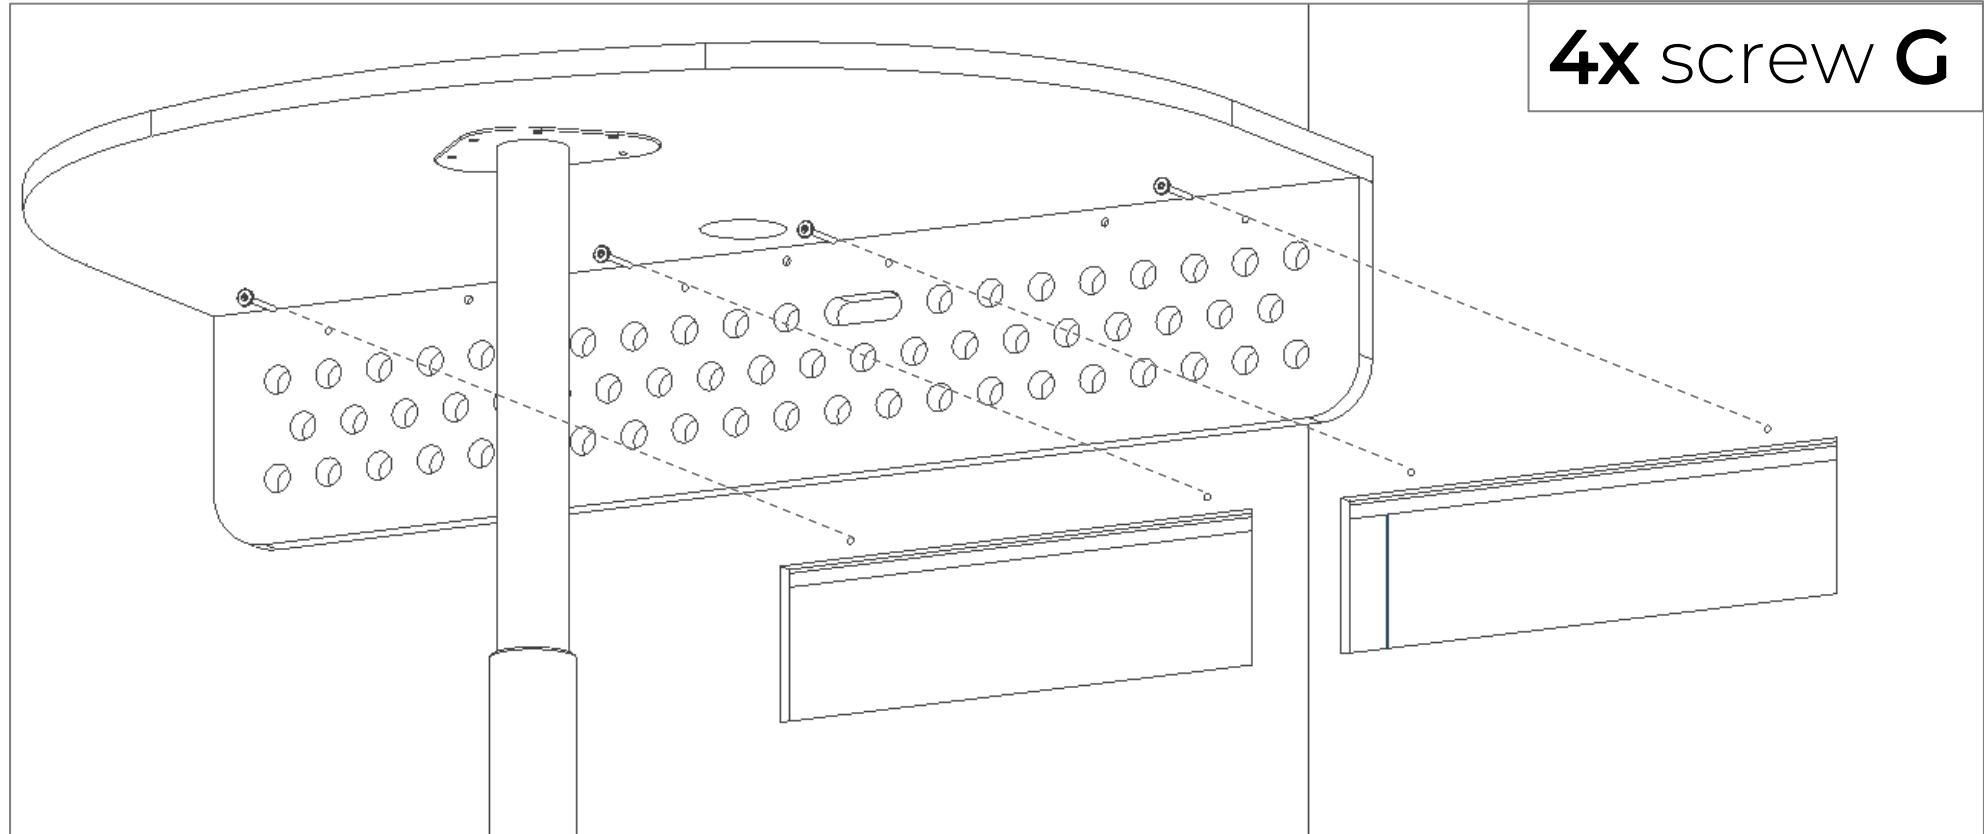

12 Mount the tableleg to the tabletop

Rotate the table leg to extend.
Standing height: Leg height = 1042 mm
Sitting height: Leg height = 722 mm

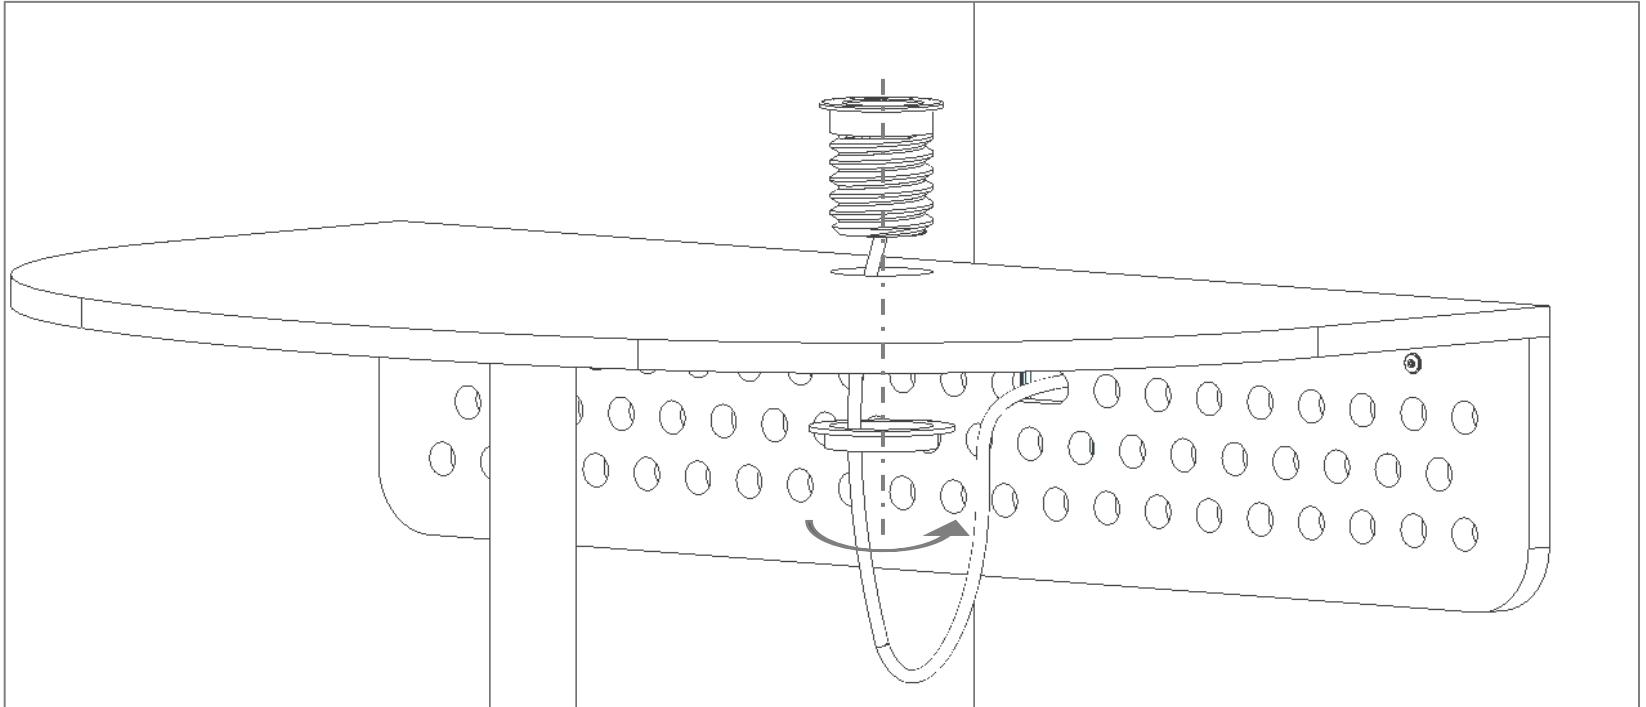

13 Mount the table through the felt panel into the support brackets.

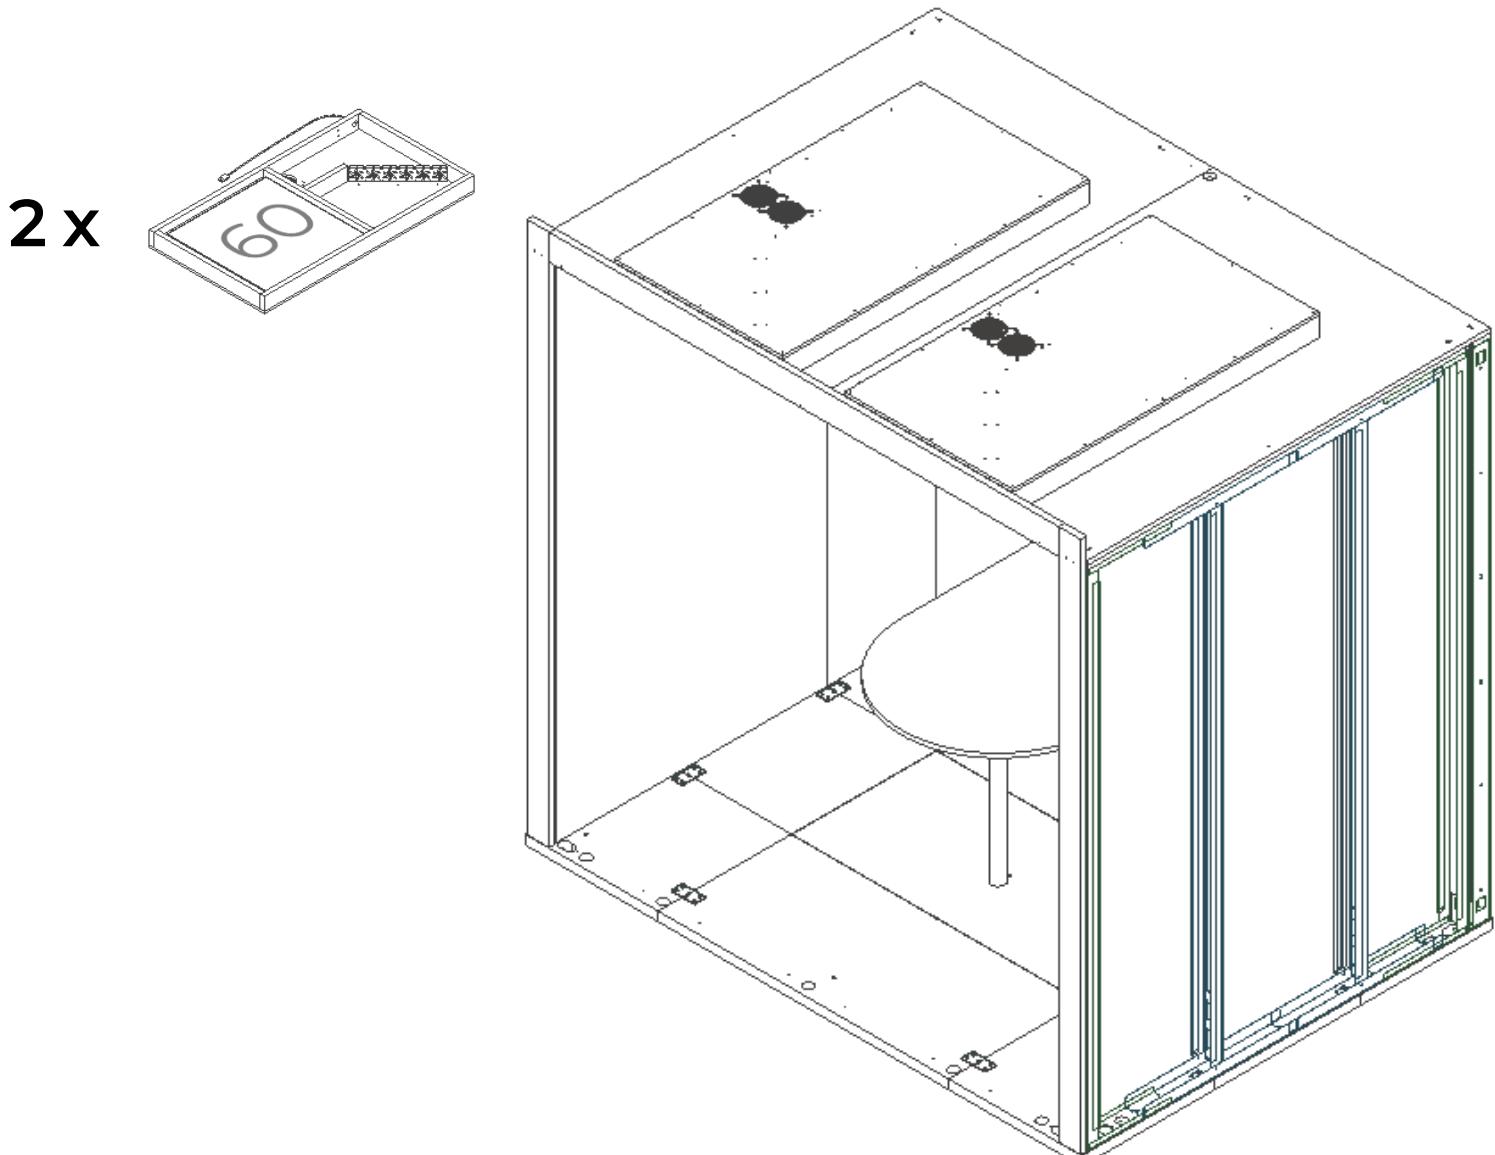

14 Install the threaded outlet plug in the tabletop.

1 x

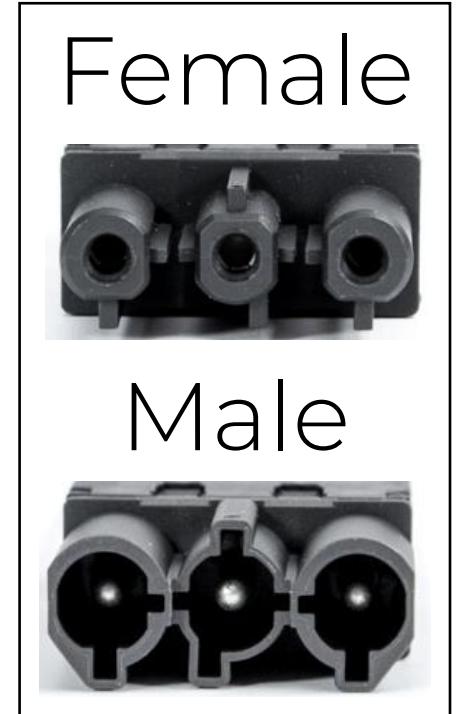

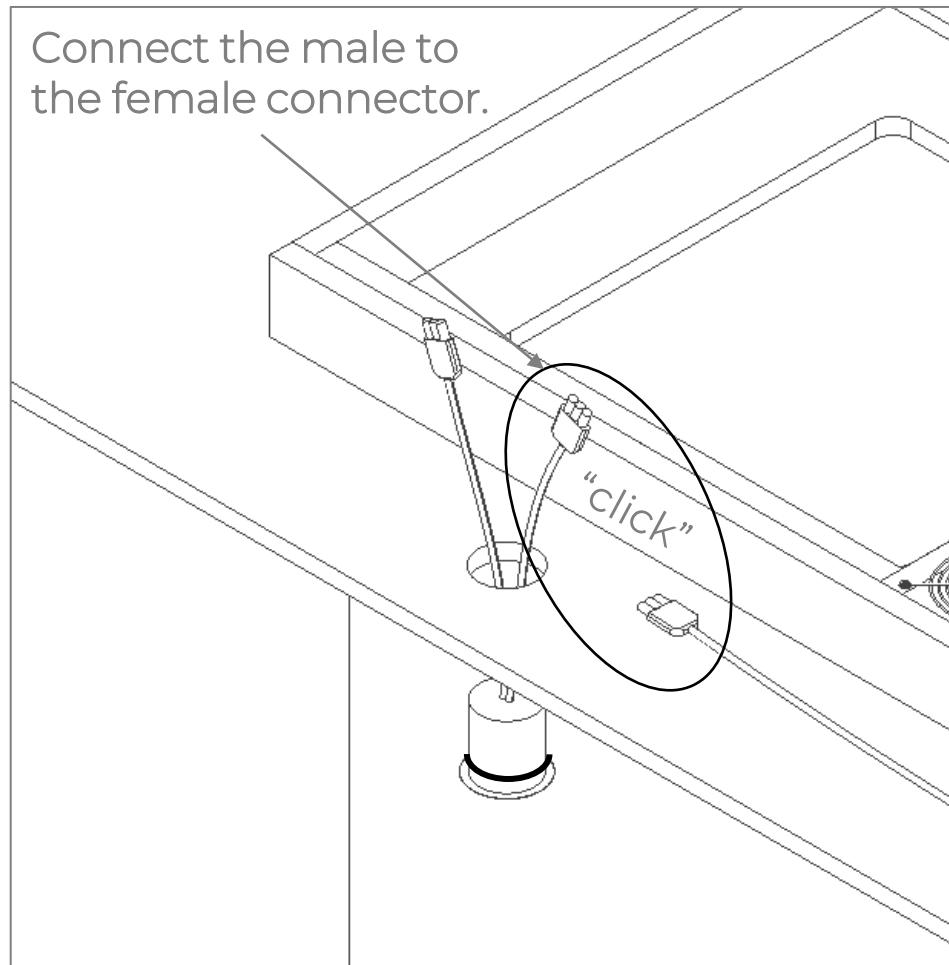

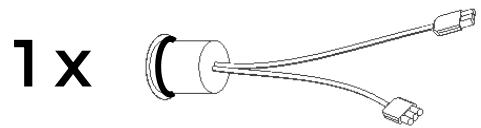

15 Position the ventilight above the ceiling cutout(s)

JUUNOO

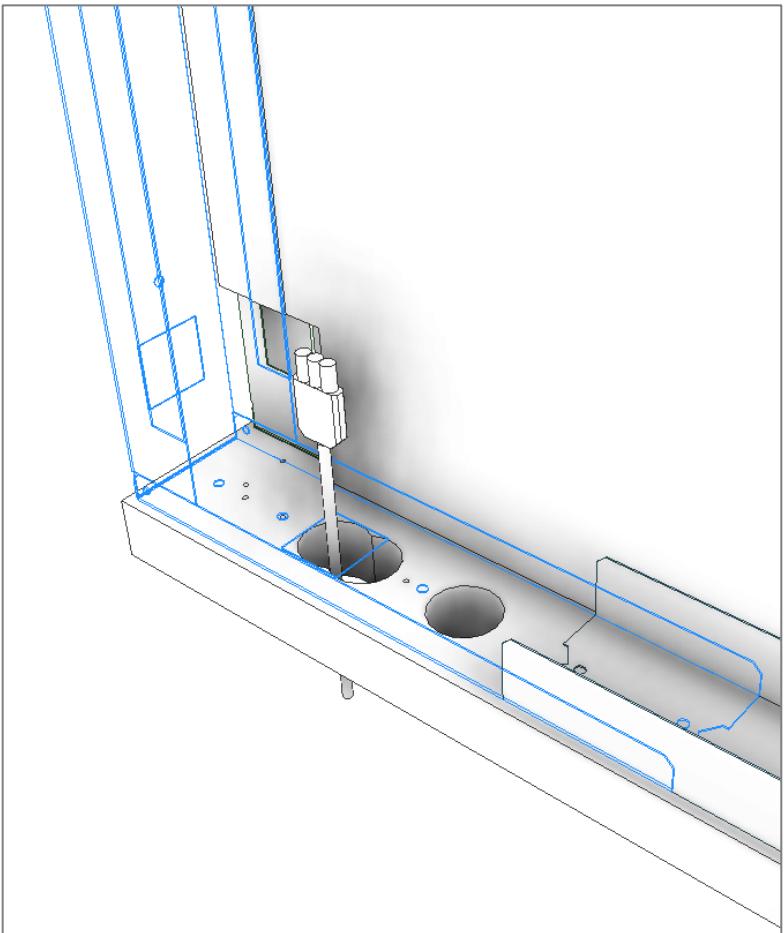

16 Leading with the cables, route the light sensor.

17 Route the power cable

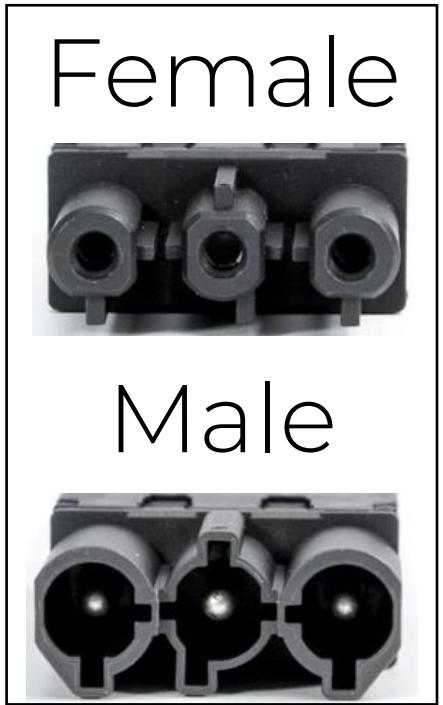

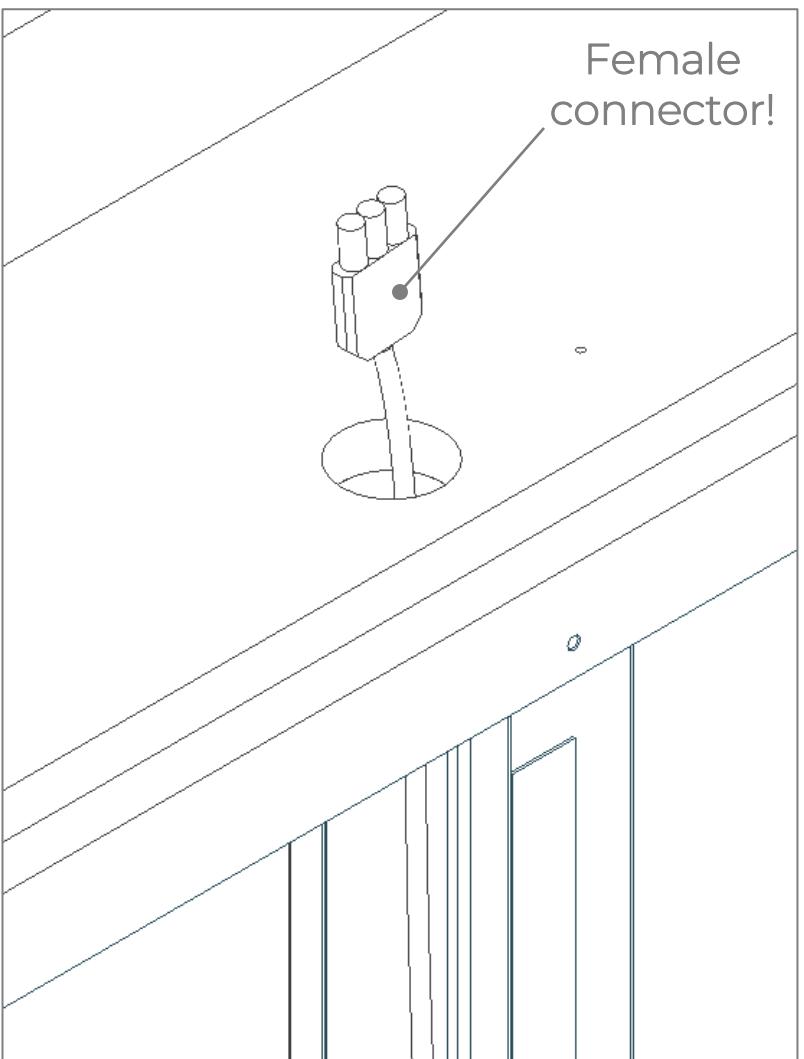

Route the connector through one of the floor tiles of the rear wall with the 8-shaped hole.

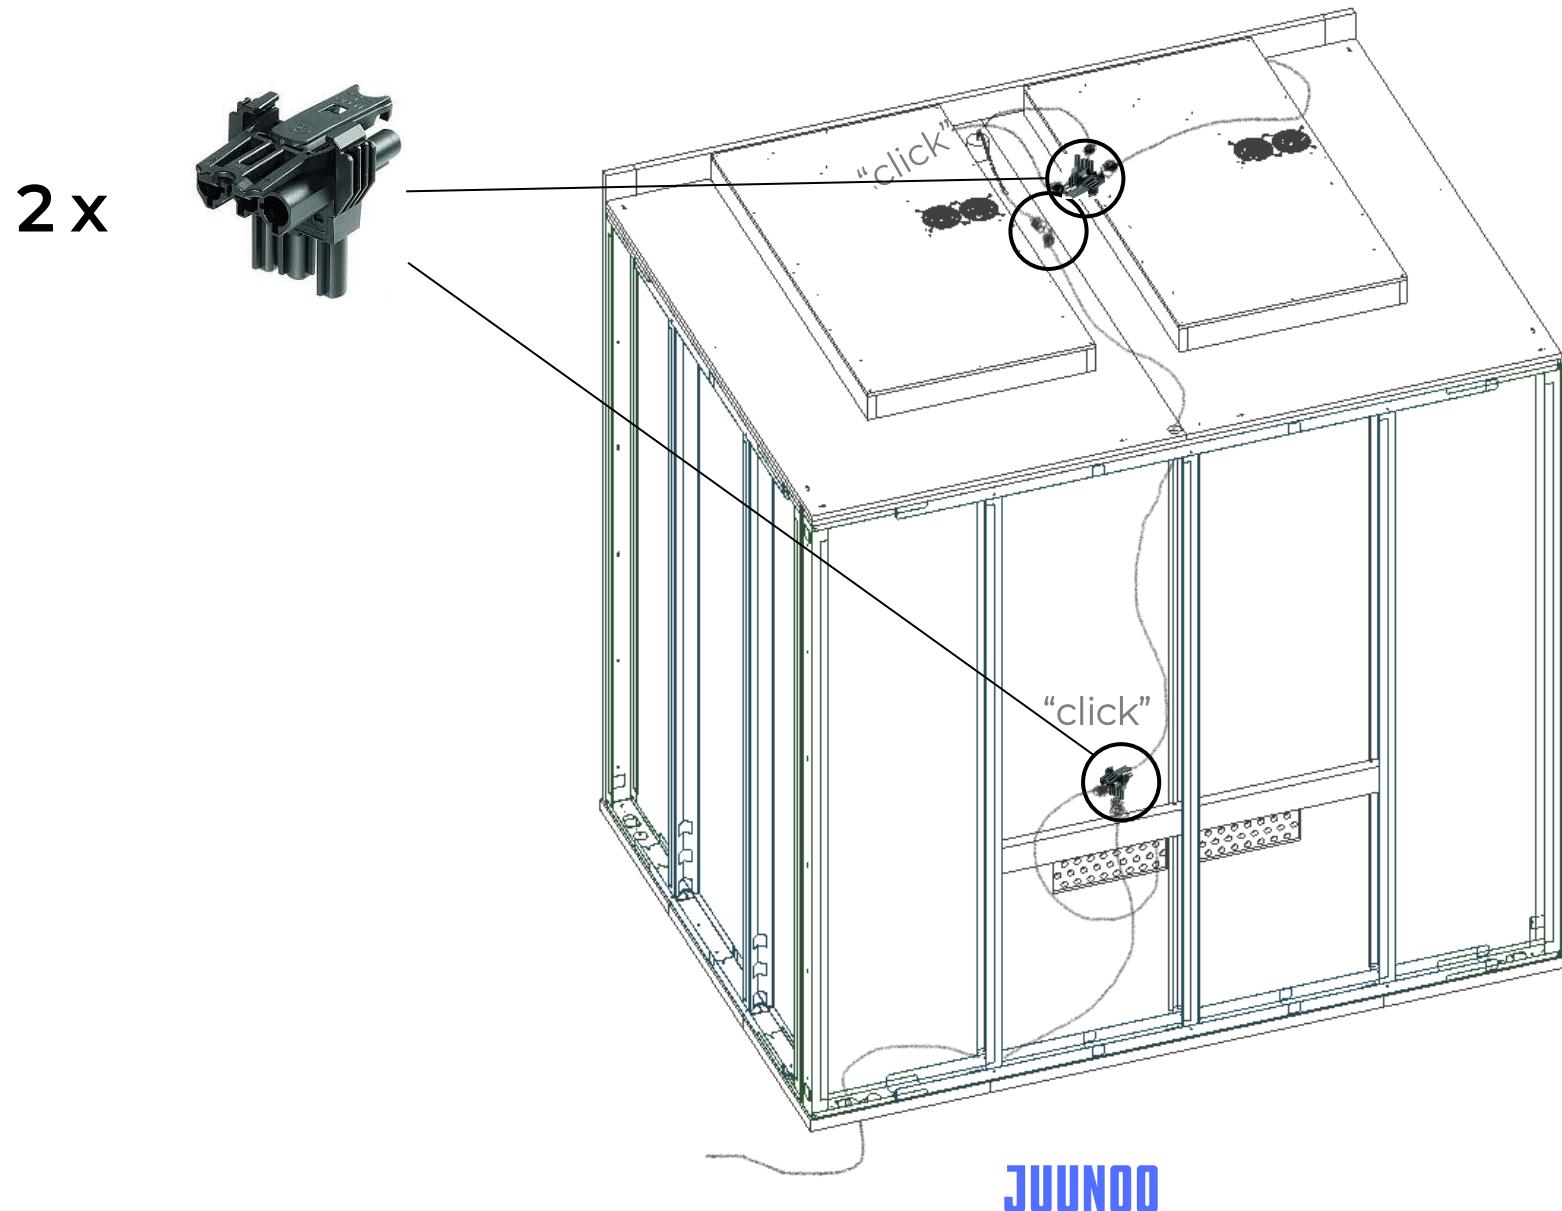

18 Route the extension cord through the ceiling hole.

1 x 
Male - Female

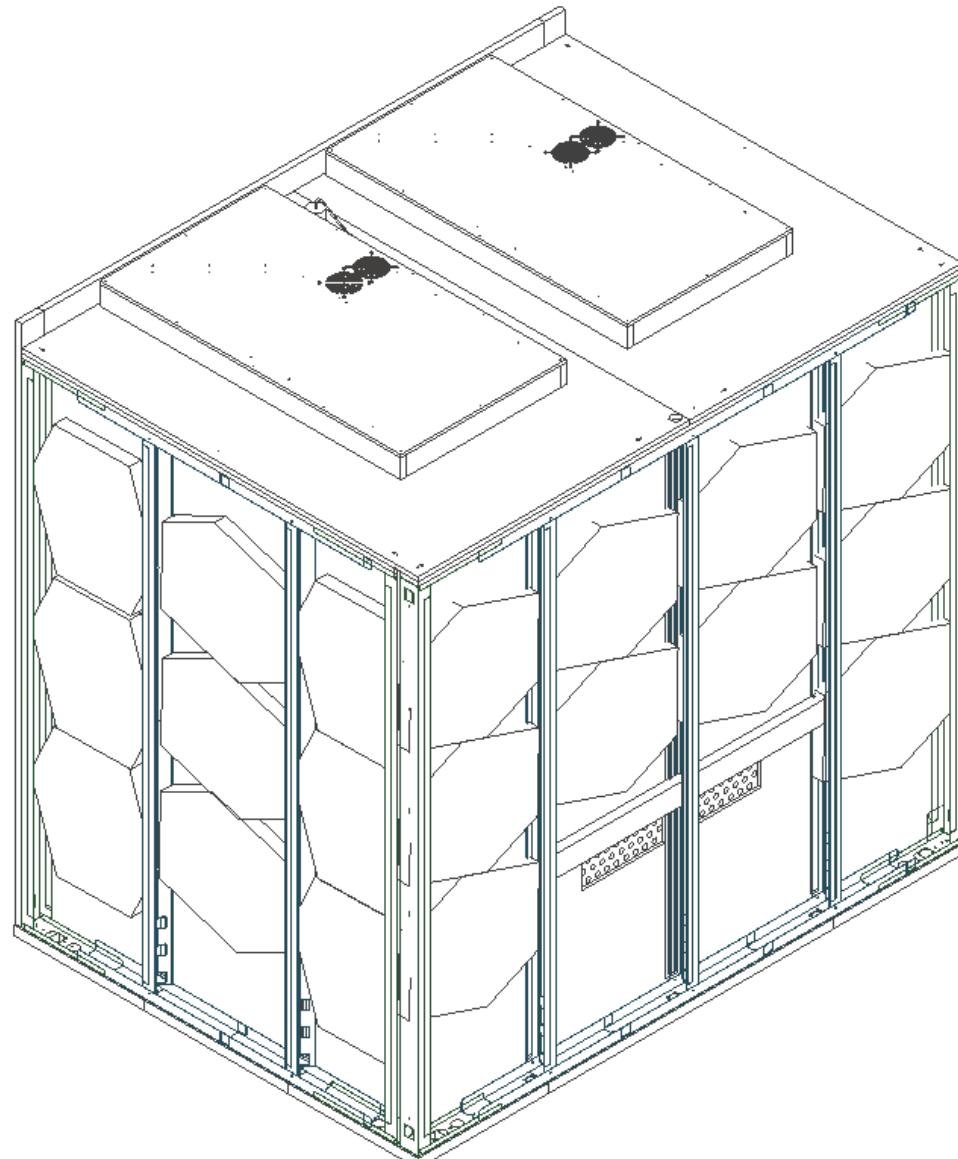

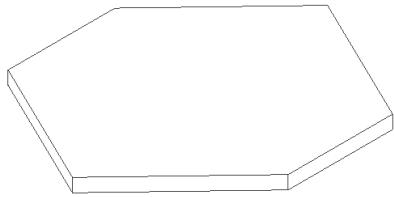

19 Connect all the electronics + the 3-way splitter plug.

JUUNOO

20 Span the hexagon foam tiles between the modules.

28 x

21 Mount the exterior click panels in the correct order:

Click panels

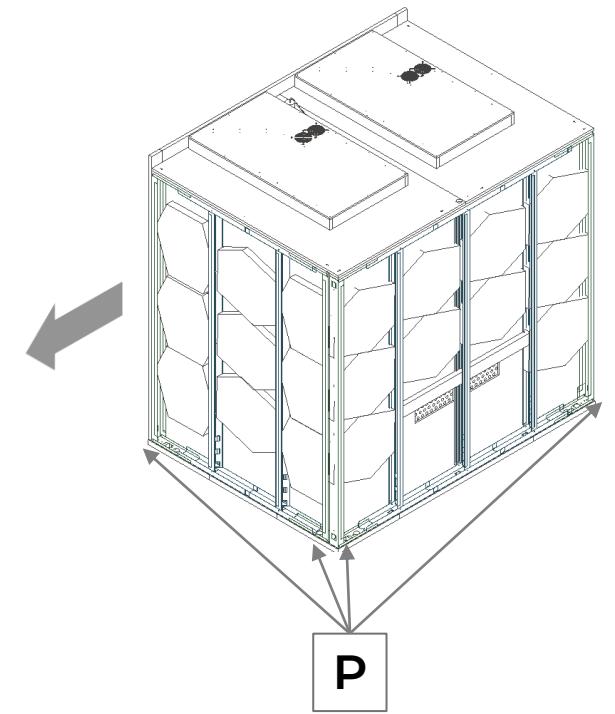

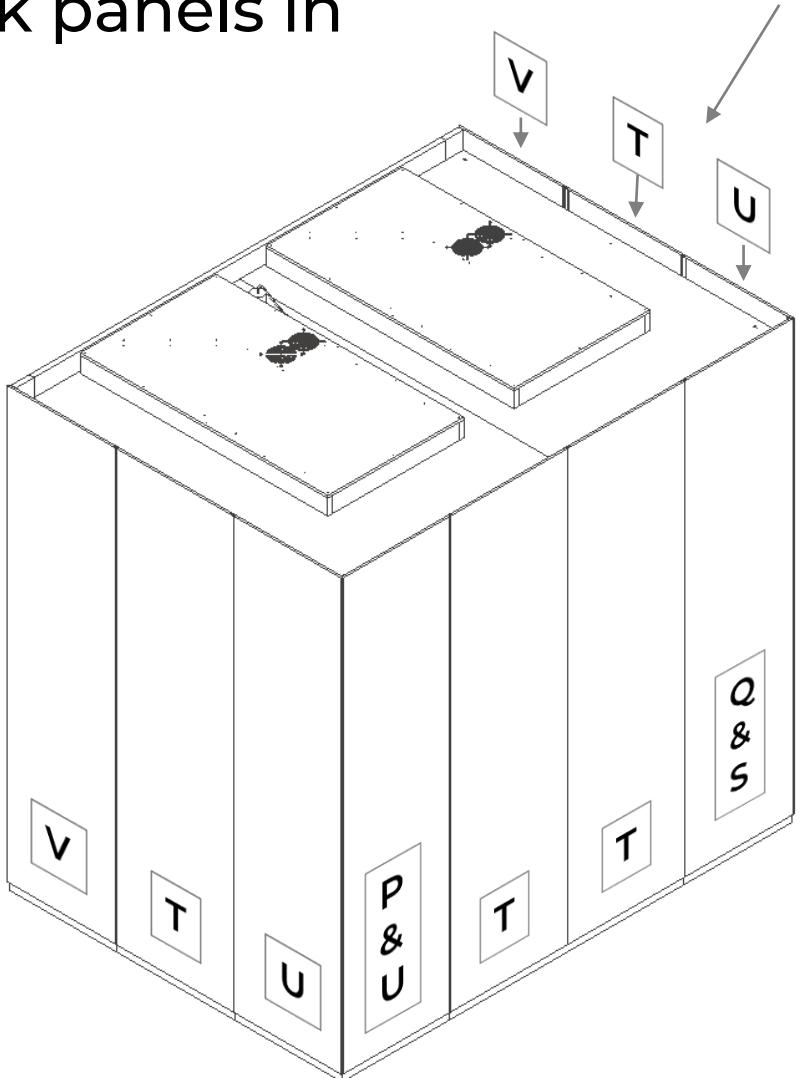

4 x

3 x

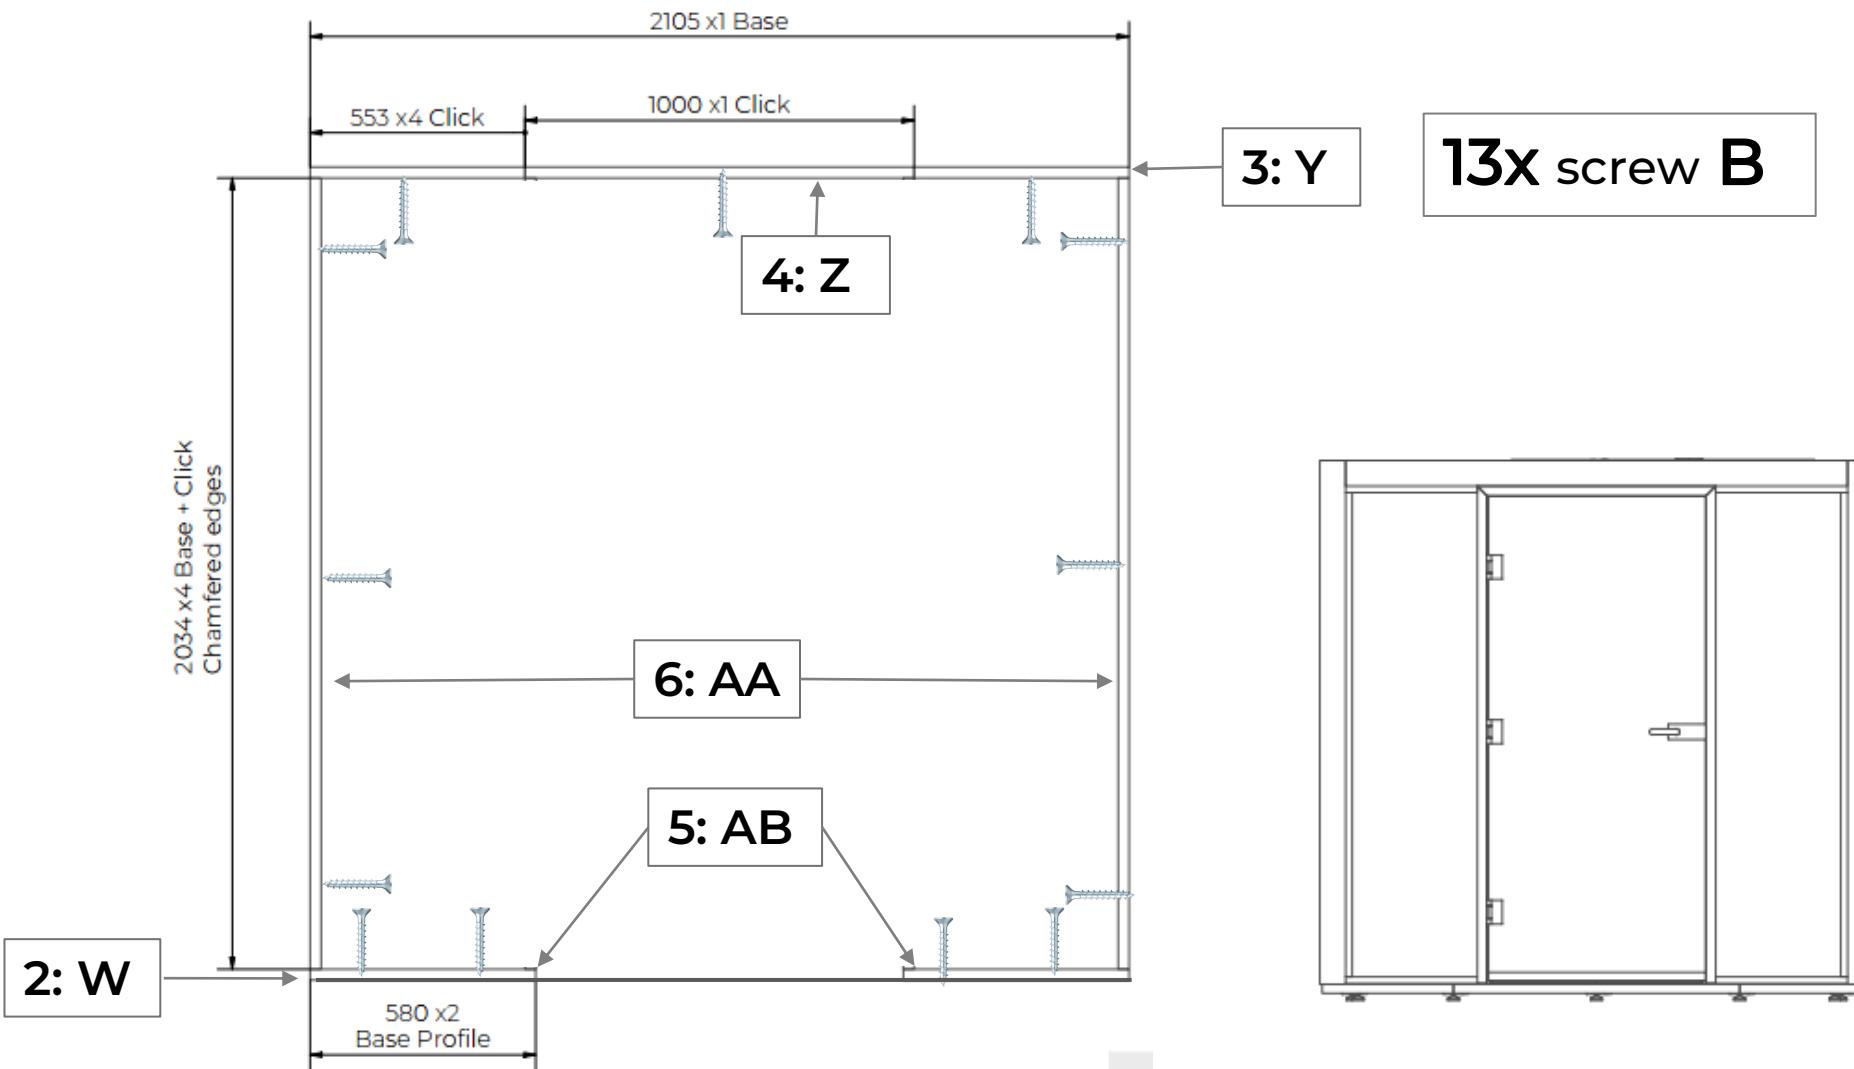

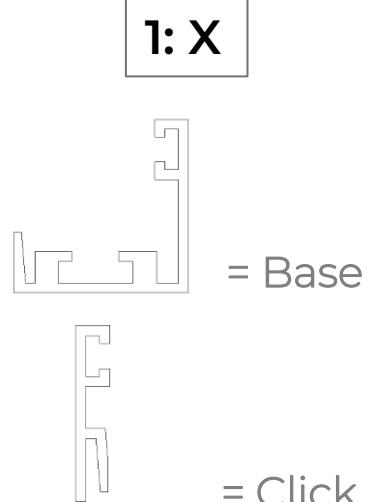

3 x

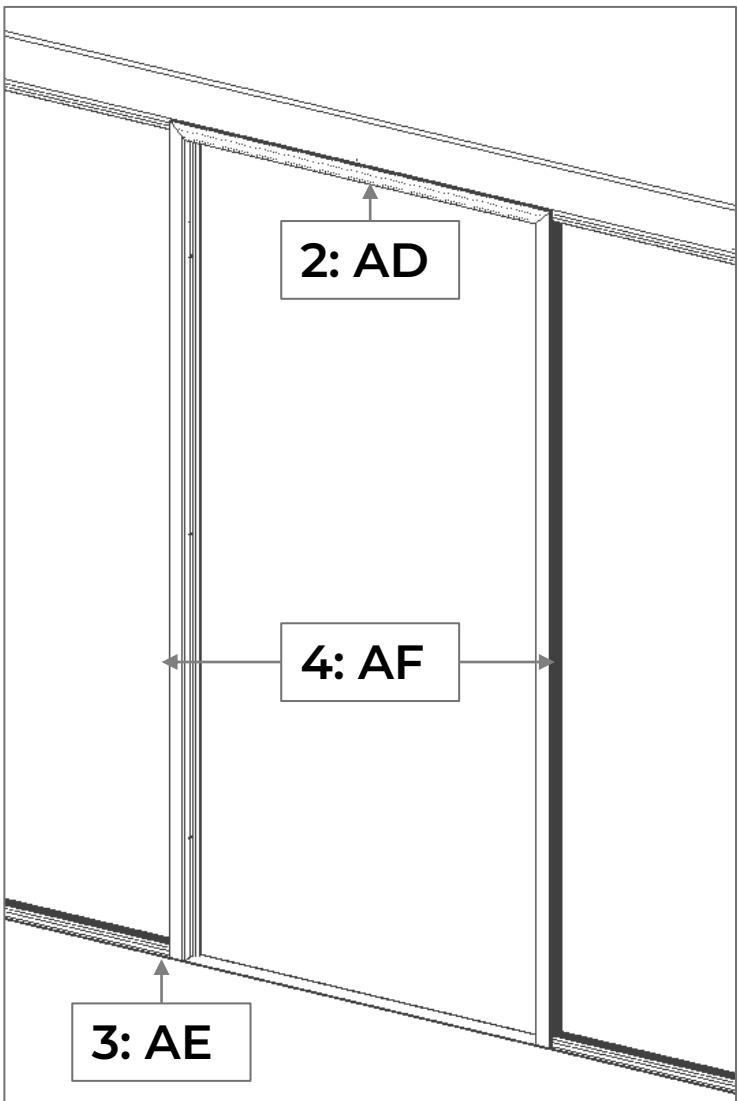

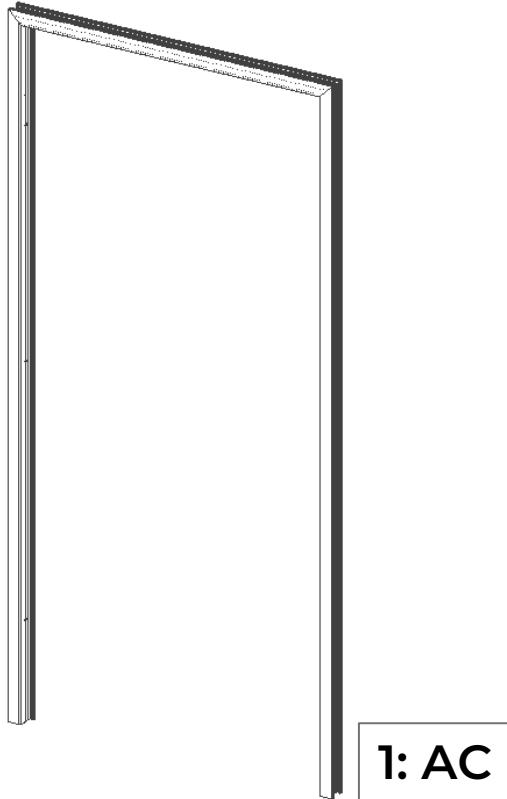

22

Screw the plinth & the outer glass base profiles to the floor & wood beams

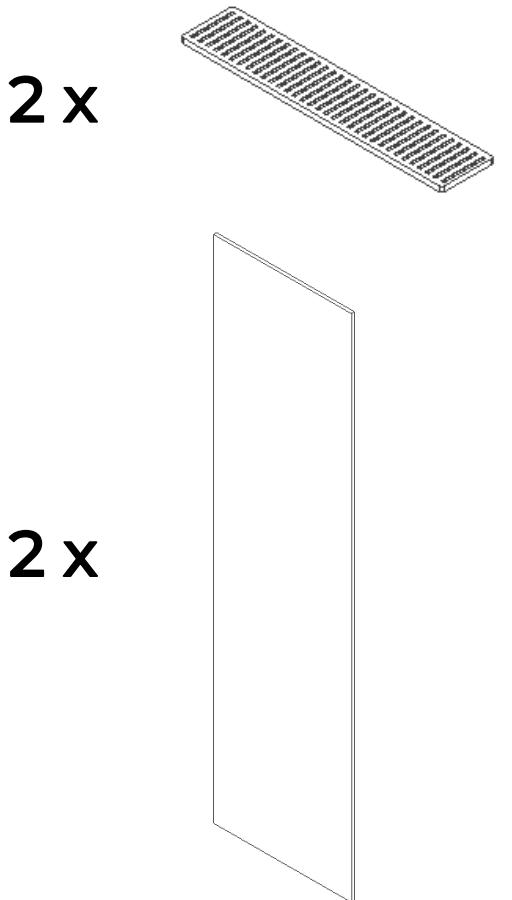

23

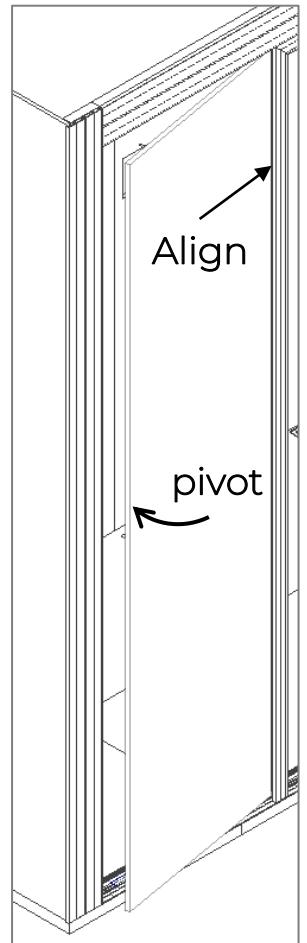

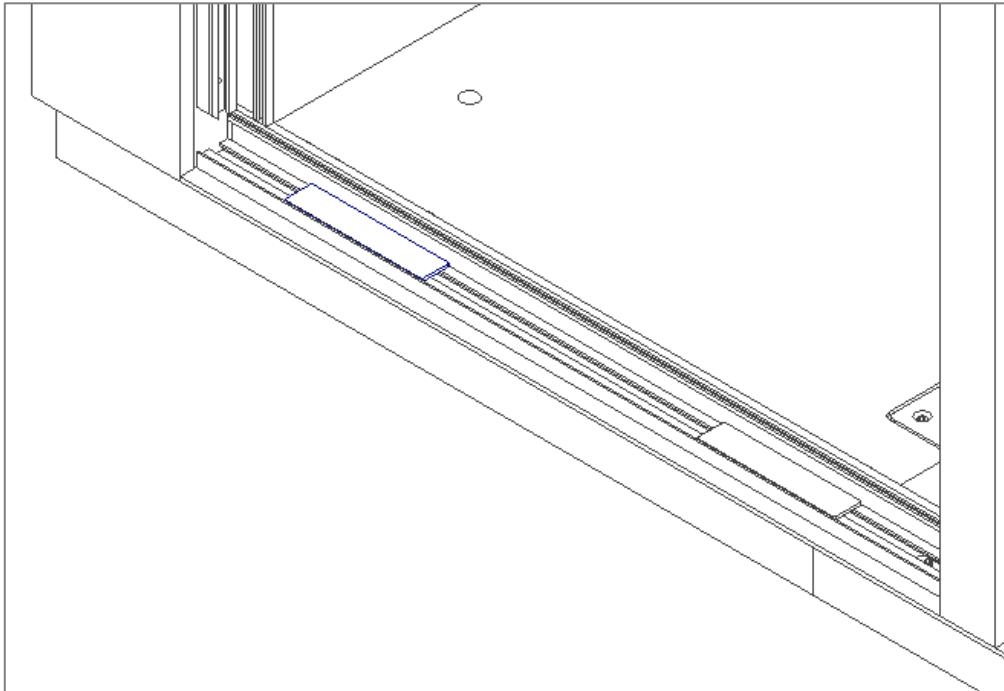

Assemble and position the door frame & the glass base profile inside the door frame.

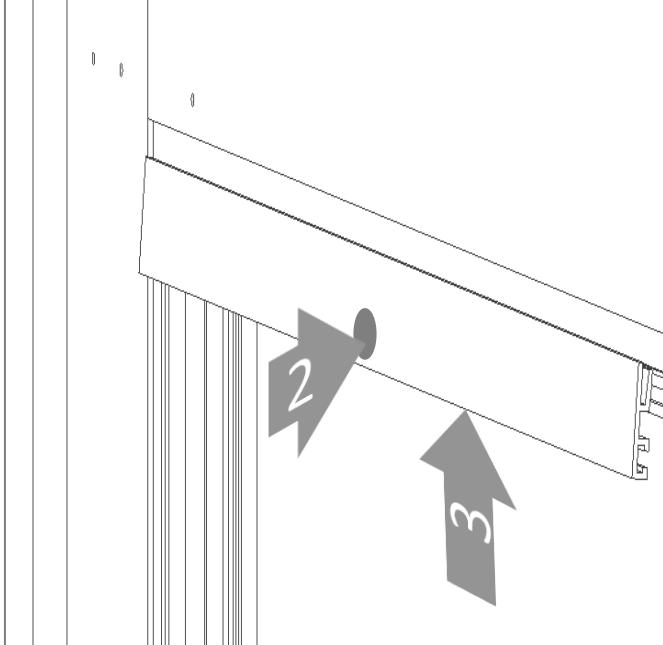

24 Position 2 shims & install the glass pane inside the aluminium frame.

Insert the glass panes towards the door first and pivot the pane inside the glass profile frame on the shims.

25 Mount the glass click profiles to seal and fix the glass panes.

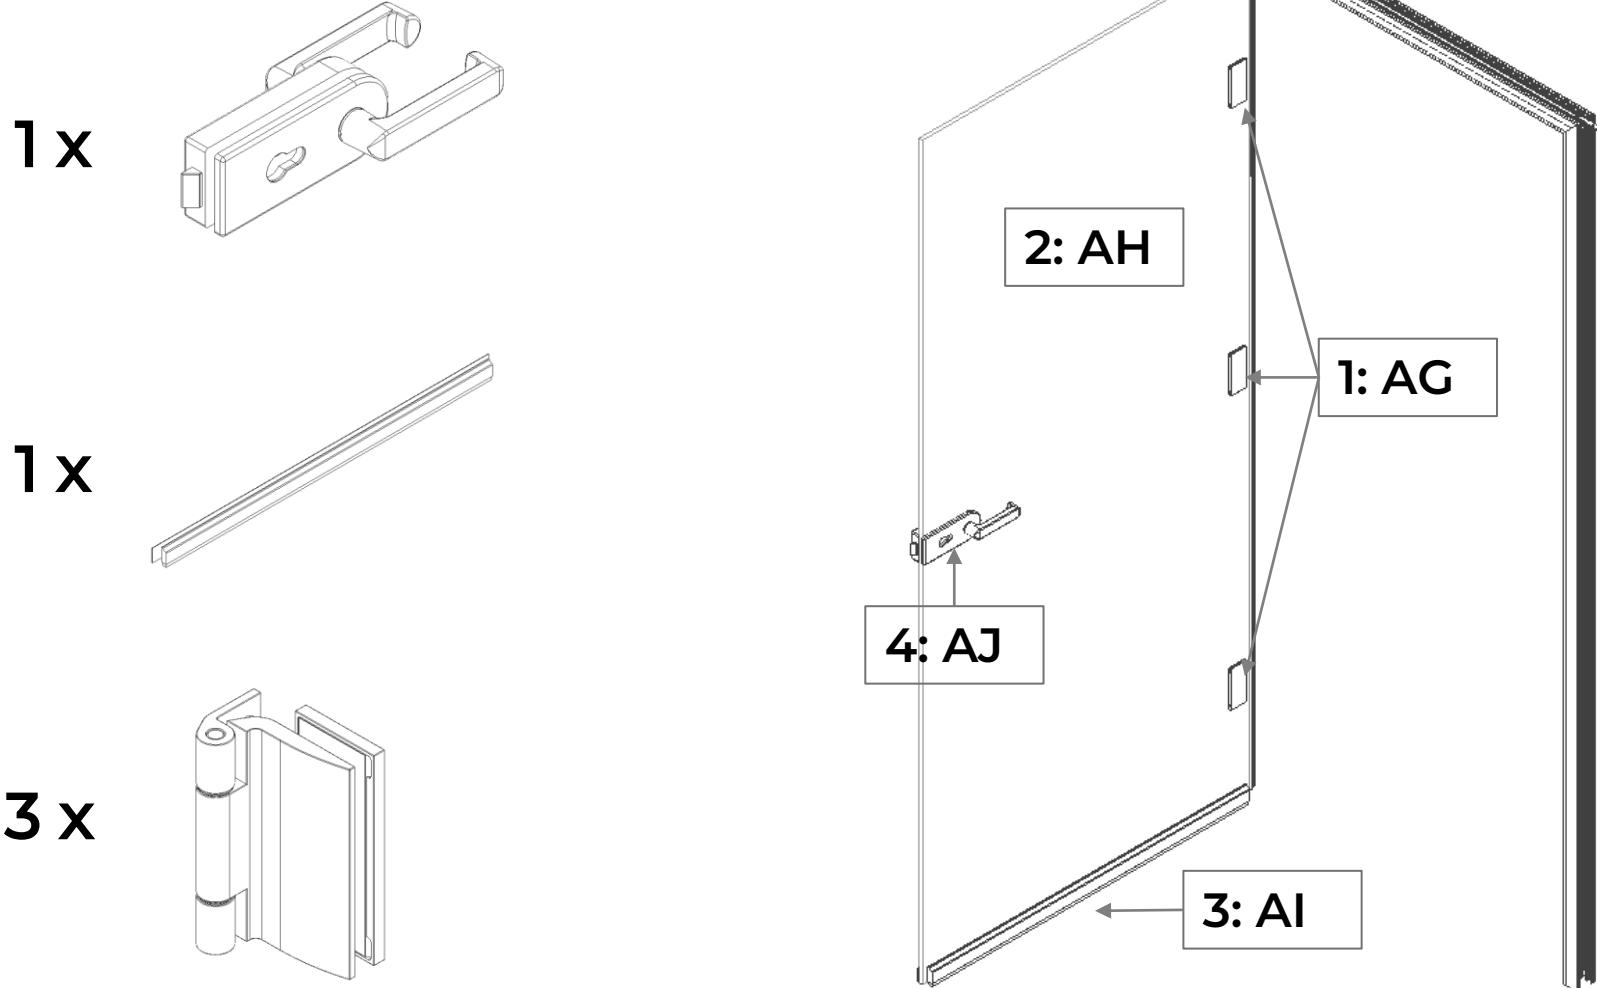

<p>Start to mount all horizontal profiles</p> <p>Follow up with the vertical profiles</p> <p>Finish with the vertical profiles <u>inside the door</u></p>	<p>Process for each profile:</p> <ol style="list-style-type: none">1. Align the click profile over the base profile2. Press the click profile flat to the glass3. Use a mallet to tap the profile fully inside the groove.	
---	---	---

TIP 1: use soap solution to lower friction and better ease in the click profiles.

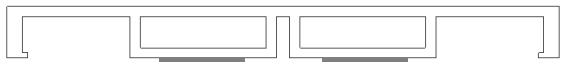

TIP 2: Check if front side and door profile is plumb so the door will not sag.

26 Mount the glass door + hinges + hardware

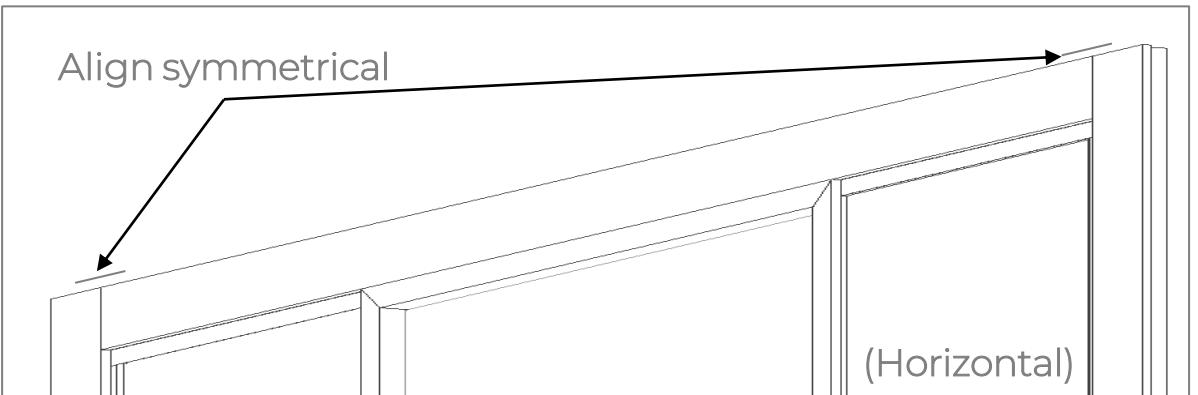

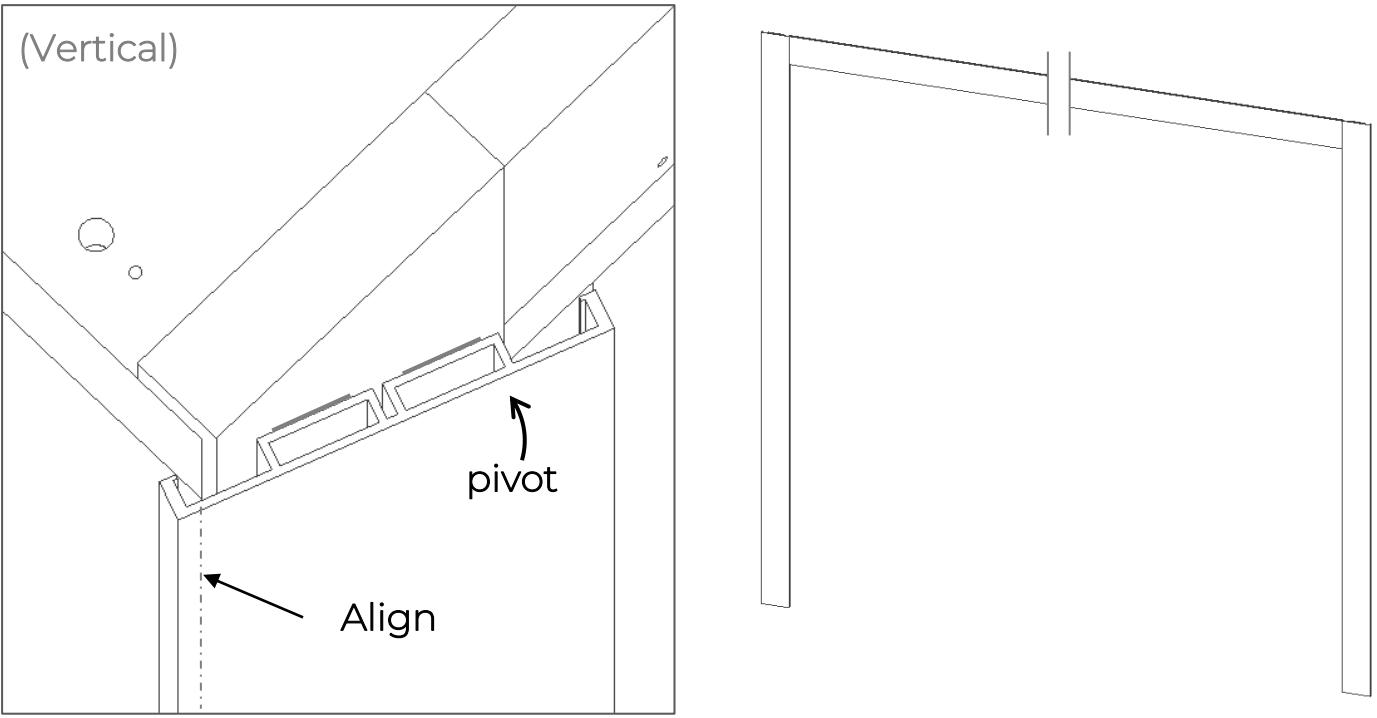

27 Tape the aluminium end covers on the wood backings

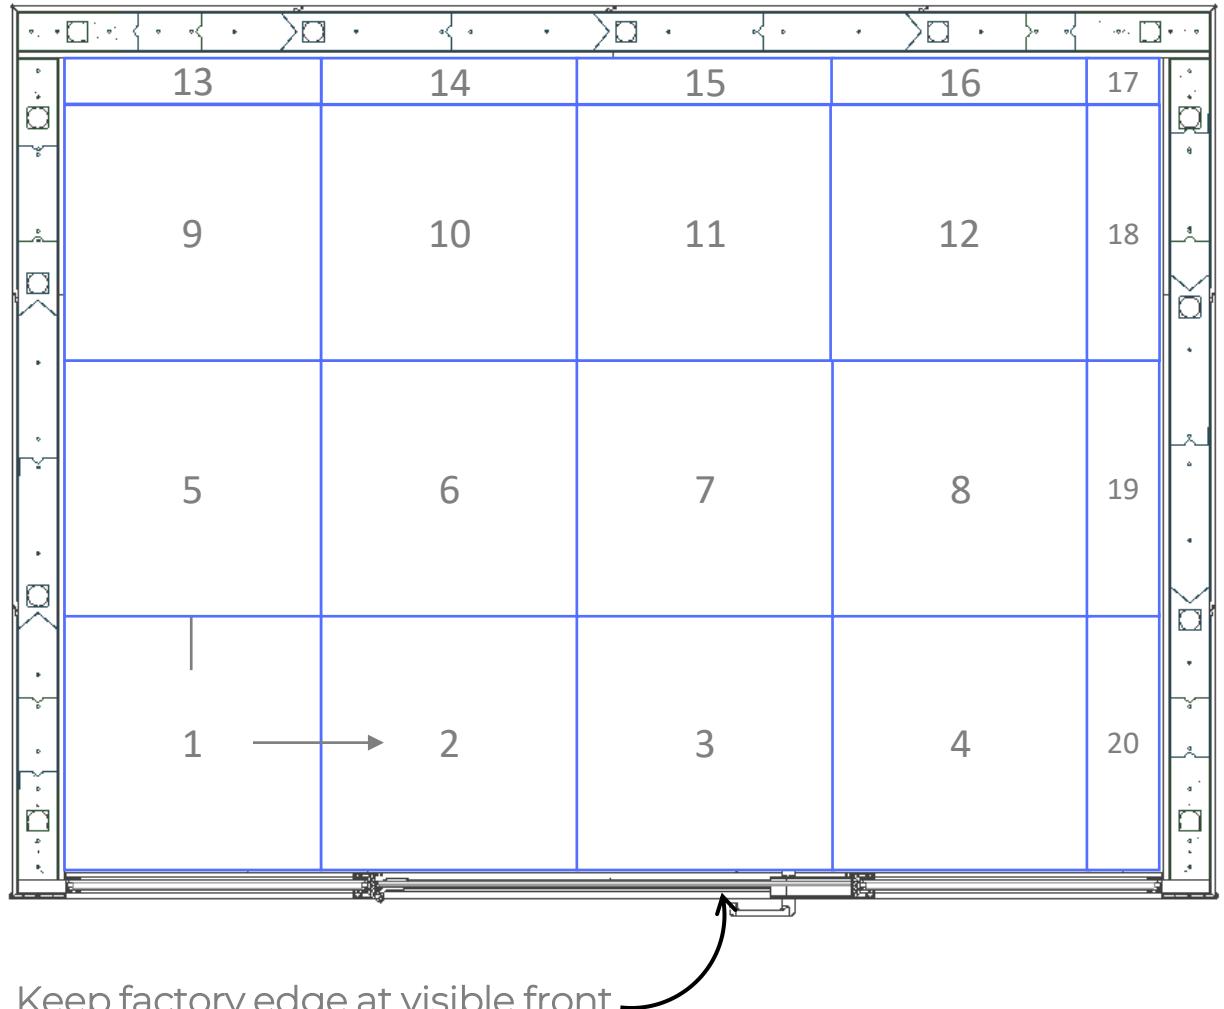

2 x (Vertical)

1 x (Horizontal)

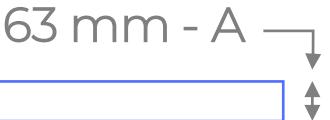

28 Install the carpet tiles

Use double
sided stick
tape below
carpets to adhere
them to the floor tiles.

Attention ! To have the
best results, you need to
see if the pod floor is
perfectly square and cut
the floor tiles to the
effective shape of the felt
panels. Measure twice!

1-12 = no cutting
13-16 = 1 Side cut (A)
18-20 = 1-sided cut (B)
17 = 2 sided cut (A&B)

A & B 17

Your pod is now ready!
